1.0 EXECUTIVE SUMMARY

Professional Environmental Engineers, Inc. (PE) conducted a Phase I Environmental Site Assessment (ESA) for the property located at 545 Leffingwell Avenue in Kirkwood, Missouri (MO), herein referred to as the subject property.

This Phase I ESA was performed in conformance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments, Designation American Society for Testing and Materials E 1527-21 (ASTM Standard). As part of this Phase I ESA, PE reviewed reasonably ascertainable records, conducted interviews, obtained other information pertaining to the subject property and completed a visual site and area reconnaissance of the property on February 20, 2023.

Standard historical sources have revealed that the subject property was shown to have been developed by 1937 by a large commercial building and four single-family residential structures. City directory listings identify the commercial structure as Engelhardt Brothers Nursery in a listing from 1949. The greenhouse structure was viewed to have been removed from the subject property by 1958. From 1968 to 2005, the residential structures were removed in segments from the subject property. In 2005, the subject property building was expanded with the northern extension of the warehouse and eastern office space. The subject property is currently currently utilized as a commercial warehouse and office used by a moving and storage operation that has operated on the subject property since 1973. The subject property is currently owned by Sabada Properties LLC.

1.1 Significant Data Gaps

Based on a review of historical sources, a data failure was encountered for ownership history and land uses from 1931 to 1936, however, the Environmental Professional (EP) does not consider this to be a significant data gap as the subject property was likely occupied by residential properties and the previously identified greenhouse during this time frame and the assumed use does not affect the ability to identify Recognized Environmental Conditions (RECs).

According to the ASTM Standard, data gaps are determined to be significant, only if "the data gap affects the ability of the EP to identify a REC." Therefore, PE did not determine there to be any significant data gaps identified in this Phase I ESA. Each of the non-significant data failures are provided in the table in Section 5.2. Any significant data gaps are summarized in the table below.

Section	Comments
Section 3 - Site Description	No significant data gaps.
Section 4 - User Provided Information	No significant data gaps.
Section 5 - Regulatory Records Review	No significant data gaps.
Section 6 - Site Reconnaissance	No significant data gaps.

1.2 Findings and Conclusions

This assessment has revealed evidence of RECs in connection with the subject property. The table below provides a summary of the report findings and conclusions. See Section 13.0 for definitions of the terms used in the table below.

Report Section		Further Action	REC	HREC	CREC	De Minimis	Non-ASTM Scope	Comments
3.0	**Site Description**	No						
4.0	**User Provided Information**	No						
5.1.1	**Federal Database Records**	No						
5.1.2	**State and Tribal Database Records**	Yes	X					See Note 1.
5.2	**Historical Use Sources**	No						See Note 2.
6.0	**Site Reconnaissance**	Yes	X					See Note 3.

Note 1: According to Environmental Data Resources (EDR) and following review of the Radius Map Report, the subject property was identified in the Underground Storage Tank (UST) database in connection with the presence of a 10,000-gallon diesel UST that was formerly located at the subject property. EDR indicated that the tank was installed in 1968 and last used in 1986. The subject property issued a closure notice to the Missouri Department of Natural Resources (MDNR) in October of 1990 and issued an approval letter in November of 1990. PE reviewed the MDNR Environmental Site Tracking and Research Tool (E-START) database to review available records in connection with the subject property. According to the MDNR, a petroleum storage tank closure was addressed prior to the adoption of the 2004 Missouri Risk Based Corrective Action (RBCA) guidance for petroleum storage tanks. The MDNR also provided that an evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client. Based on the absence of testing documentation available following the closure of the UST and the current RBCA guidance in use, PE considers the former UST to represent a REC and a Vapor Encroachment Condition (VEC) in connection with the subject property.

Note 2: The subject property was identified to contain a greenhouse on the southwest portion of the subject property in records from 1937 until it was shown to be removed by 1958 based on available aerial photographs, topographic maps, and city directory listings. PE researched the name of the city directory listing provided in 1949, *Engelhardt Bros (Greenhouse)*. During the research, PE identified a file record of a law suit from 1953 identified as *Bergamo v. Engelhardt*. The suit involving Rudolph and Otto Engelhardt (defendants) and Emmy Rose Bergamo (plaintiff) claimed that husband of the plaintiff accidently ingested insecticide at the property, known as *Engelhardt Brothers Nursery*, in December of 1950 following cleanup efforts from a hailstorm that broke out the glass of the 16,000 SF greenhouse. The husband subsequently died following the incident and the plaintiff was awarded a judgement of $7,500 for primary negligence of the defendants following the husband's death. The greenhouse is considered to have closed following the judgement in 1953. Although, insecticides and other poisonous substances were identified to be kept on the premises, historical records indicate that the greenhouse was present on the subject property for approximately 16 years, and had been shown to be removed by 1958. Additionally, the surface material was reworked and graded out in 1973 for the development of the current asphalt parking lot that is placed over the former greenhouse location. Based on the length of duration on the subject property and the reworked surface material near the greenhouse footprint for the asphalt installation, PE does not consider the former greenhouse or the likely presence of poisonous substances at the subject property in 1950 to represent a REC in connection with the subject property at this time.

Note 3: During the performance of the site reconnaissance, PE observed a 3,500-square foot (SF) commercial auto garage building, located adjacent to the former UST that was originally utilized to facilitate vehicular maintenance activities on the subject property. Within the garage building, PE observed one floor drain located in the large garage bay within the northern portion of the building. According to the property owner, since the property was acquired in 1986, the garage has not been used to perform maintenance, however its use prior to the property acquisition could not be confirmed. Based on the historical intended use of the garage for maintenance purposes, the likely

presence that motor oils and potentially hazardous substances generated from the garage, and the connection to the former UST, PE considers the garage building and the likely potential of historical vehicle maintenance being performed on the subject property to represent a REC in connection with the subject property.

1.3 Recommendations

Based on information collected during this Phase I ESA, PE offers the following recommendations:

- PE recommends completing a limited Phase II ESA to investigate potential soil and groundwater contamination at the subject property related to the historical operation of the garage building for maintenance purposes and the former presence of the diesel UST on the northwest side of the garage.

2.0 INTRODUCTION

PE completed this Phase I ESA in conformance with ASTM Standard. Any exceptions to, or deletions from this practice are described in the following section of this report. As part of this Phase I ESA, the EP reviewed reasonably ascertainable records and other information pertaining to the subject property.

2.1 Purpose

The purpose of the Phase I ESA is to identify, to the extent feasible, RECs in connection with the subject property pursuant to the procedures prescribed by the ASTM Standard. Controlled Recognized Environmental Conditions (CRECs), Historical Recognized Environmental Conditions (HRECs), and *de minimis* conditions are also considered, as are VECs. Definitions are included in Section 13 of this report.

2.2 Scope of Work

The scope of the Phase I ESA consisted of the following:

- Reviewing reasonably ascertainable information pertaining to the subject property in order to help identify the general site characteristics of the subject property including: the location of the site, current occupants and associated business activities, a description of the structures, roads and other improvements, the surrounding areas, plus information pertaining to the physical setting of the site, including the current topographic map if reasonably ascertainable. (Section 3)

- Conducting interviews with appropriate personnel knowledgeable with the use and characteristics of the subject property and adjoining properties, if available. (Section 4 and 8)

- Reviewing standard regulatory records to help identify properties located within the prescribed ASTM minimum search distances, consisting of reasonably ascertainable records including federal, state, and tribal databases for: Superfund sites, hazardous waste facilities and generators, registered storage tanks and leaking storage tanks, Emergency Response Notification System, hazardous waste sites, solid waste disposal sites, Brownfields and voluntary cleanup sites, and institutional control/engineering control registries. (Section 5.1.1 and 5.1.2)

- Reviewing standard historical records to develop a history of the obvious uses of the subject property from the present time back to its first developed use, or back to 1940, whichever is earlier; and identifying uses of surrounding properties if revealed in the course of researching the subject property. Research consisted of the review of at least one of the following reasonably ascertainable records: street directories, fire insurance maps, topographic maps, aerial photographs, limited ownership records, building department records, zoning/land use records, property tax files, recorded land title records, records from local agencies, previously conducted environmental assessments or remediation projects, or other historical sources. (Section 5.2)

- Performing a site reconnaissance, including a visual observation of unobstructed, accessible areas of buildings and property grounds. Adjacent properties and surrounding areas were observed from the subject property and from public thoroughfares. (Section 6)

- Reviewing available information in consideration of the potential existence of VECs on or near the subject property. This is not a complete Vapor Encroachment Screen (VES) as described in ASTM E2600-10 nor is it required to be under ASTM E1527-21. Information compiled from completion of all tasks mentioned above (Sections 3-6) was used in considering VECs. (Section 7)

- Summarizing and evaluating findings and providing opinions on whether they constitute RECs, CRECS, HRECs, or *de minimis* conditions. (Section 10.1)

- Providing conclusions on the presence of RECs, if identified. Identifying and addressing data gaps and evaluating their significance in relation to our ability to identify RECs. Providing opinions regarding additional appropriate inquiry and/or investigation, if any. (Section 10.2)

- Preparing and providing this final report documenting the Phase I ESA.

No special terms and conditions or client-imposed constraints have been placed on the EP by the person(s) requesting their services.

2.3 Significant Assumptions

There were no assumptions made in this report that are considered as having a significant impact on the determination of RECs in connection with the property.

Other assumptions made by the EP in conducting this assessment include the following:

- Site operations reflect site conditions relative to potential releases and no intentional concealment of environmental conditions or releases have occurred.

- Interview information is directly reported as gathered by the EP and is limited by the accuracy of the interviewee's recollection and experience.

- A "No Further Action" (NFA) letter or the "closure" of a site by the regulatory agency indicates not only that no further action is necessary on the site in question, but also that no further action is necessary offsite as it may relate to contamination, if any, released from the site in question.

- Where no other definitive groundwater flow direction data (such as groundwater contour maps) are available, groundwater is generally assumed to flow in the direction of the topographic gradient.

2.4 Limitations and Exceptions

PE certifies that it has used accepted and standard professional practices in conducting this assessment. This Phase I ESA was performed under constraints of time and costs. The information in this report has been compiled from sources assumed to be reliable and accurate. However, PE cannot guarantee the accuracy of information supplied by others. References to previous reports conducted by other environmental firms are presented for informational purposes only and should not be relied upon, except to the extent described in these reports, if allowed at all. The information presented in this report was based solely upon the conditions, operations, and practices as observed on the dates of the site reconnaissance and the additional sources detailed herein. Reasonable efforts were made to visually and physically inspect the entirety of the subject property; however, objects, vegetation, pavement, structures, debris piles, etc. (if present), can obstruct the view of RECs and are always general limiting conditions.

As a legal property survey is not within the scope of this assessment, the site boundaries depicted in attached figures and site boundaries assumed during the course of this assessment are based on information provided by the City of Kirkwood (the "User" of this Phase I ESA) and information gathered during the course of this assessment.

2.5 Deviations

No deviations from the ASTM Standard were made in this Phase I ESA.

2.6 User Reliance

This report, and the findings contained herein, shall not, in whole or in part, be altered, dispersed, or disclosed to any other party. This report is intended solely for the use of the City of Kirkwood and agents/clients engaged by them. No other party may rely on the information presented herein without the written permission of PE.

3.0 SITE DESCRIPTION

This section summarizes information which describes the subject property.

3.1 Location and Legal Description

The subject property is located at 545 Leffingwell Avenue in Kirkwood, Saint Louis County, MO. The subject property is composed of two parcels of land measuring a total of 9.0 acres and currently consists of a warehouse and office building and a garage, both operated by A-Mrazek Moving Systems. A site vicinity map showing the subject property location is included in **Appendix A**. Review of the Saint Louis County Assessor's website identified the subject property as having Locator Numbers 24M240172 and 24M240161. Additional property information is included in **Appendix J**.

3.2 Current and Historical Use of the Property

The subject property is currently currently utilized as a commercial warehouse and office used by a moving and storage operation that has operated on the subject property since 1973, when the current buildings were developed. In 2005, the subject property building was expanded with the northern extension of the warehouse and eastern office space. Historically, the subject property is shown to have been developed by 1937 by a large commercial building and four single-family residential structures. City directory listings identify the commercial structure as Engelhardt Bros Greenhouse in a listing from 1949. The greenhouse structure was viewed to have been removed from the subject property by 1958. From 1968 to 2005, the residential structures were removed in segments from the subject property.

3.3 Description of Structures and Site Improvements

Site improvements on the subject property include a 76,000 SF warehouse building containing a three-story office area, and a 3,500 SF garage building. Both structures were developed in 1973 and the warehouse structure was expanded in 2005. Other site improvements include concrete and asphalt paved parking areas, a metal fence surrounding the property building, overhead electric lines and poles, overhead light poles, and a storm water detention pond located on the northern portion of the subject property. See **Appendix B** for a site plan showing an aerial view of the subject property, the developed structures, and site improvements at the subject property.

3.4 Adjoining Property Information

Information for the adjoining properties is listed below.

Direction From Site	Address	Name of Occupant	Land Use	Potential Concerns
North	Multiple Addresses	Single-Family Residential	Residential	None.
South	No Address	Oak Hill Cemetery	Unimproved	None.
East	538, 556, 566, 572 Leffingwell Avenue	Platinum Tinting, NJL Custom Homes, Edgebanding Services, Gateway Representatives	Commercial/ Industrial	None.
West	Multiple Addresses	Single-Family Residential	Residential	None.
Southeast	567 Leffingwell Avenue	Frisch Masonry	Commercial	None.

3.5 General Setting Sources

The EP reviewed information regarding the physical land conditions of the subject property, as indicated in Sections 3.5.1 through 3.5.5 below.

3.5.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Series Topographic Map, Kirkwood, MO Quadrangle, dated 2017, and information obtained from the EDR Geocheck Physical Setting Source Report, the subject property is located at approximately 603 feet above mean sea level (msl). Topography across the subject property is relatively flat with a gradual slope towards the east. A copy of the topographic map is provided in **Appendix A**.

3.5.2 Soils

According to the United States Department of Agriculture (USDA) Soil Conservation Service Soil Survey listed in the EDR report, the surficial material on the subject property is designated as urban land. Urban land is characterized as not hydric. Classification details were not provided by EDR.

3.5.3 Geology

According to the EDR Radius Map with Geocheck report, bedrock in the vicinity of the subject property consists of stratified sequences of Mississippian, Paleozoic Era, Meramecian Series.

3.5.4 Hydrogeology and Surface Water Bodies

Site specific groundwater information was not available for the subject property; however, based on the surface topography, as interpreted from the USGS topographic map, regional shallow groundwater in the area is assumed to flow to the east. Actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this assessment. Currently, there is a wetland riverine containing standing water running across the northeastern portion of the subject property from northwest to southeast. The Meramec River is located approximately 2.4 miles southwest of the subject property, which flows generally from northwest to southeast.

3.5.5 Other General Setting Sources

FIRM Map

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), Panel Map Number 29189C0309K, dated February 4, 2015, the northeast portion of the subject property is located within a flood zone designated as Zone AE, where base flood elevations are provided. A copy of the FIRM is included in **Appendix J**.

Wetlands Map

The United States Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) Online Wetland Mapper website was reviewed to identify potential wetlands which may be located on the subject property. According to the USFWS NWI Map, a riverine exists along the northeastern portion of the subject property that runs from northwest to southeast along Leffingwell Avenue. A copy of this map is provided in **Appendix J.**

4.0 USER PROVIDED INFORMATION

In accordance with the ASTM Standard, this section summarizes information and documentation requested by the EP from the User that could help identify RECs in connection with the subject property.

4.1 User Specialized Knowledge

The User reported that the subject property formerly contained the presence a UST that was reportedly removed from the property in November of 1990. No other specialized knowledge or reasonably ascertainable information relevant to environmental matters pertaining to the subject property was provided. A copy of the User Questionnaire is included in **Appendix D.**

4.2 Title Records

A complete chain-of-title report was not provided by the User. Current ownership information was obtained when AFX Research, LLC (AFX) conducted an Environmental Lien and Activity Use Limitation (AUL) search. The current owner is listed as Sabada Properties, LLC. A copy of this information is included in **Appendix J**.

4.3 Environmental Liens or AULs

The User stated in the questionnaire that they are not aware of any environmental liens or AULs with regard to the subject property. PE contracted with AFX to provide a search for environmental liens or AULs for the property. No environmental liens or AULs were found in the standard search of records for the subject property dating back to the earliest available deed from 1989. A copy of this report is included in **Appendix J**.

4.4 Valuation Reduction for Environmental Issues

The User reported no knowledge of any valuation reduction of the subject property for environmental issues, and reports that the price of this property reflects fair market value of the property based on information obtained in the User Questionnaire.

4.5 Owner, Property, Manager, Occupant Information

The subject property is currently occupied by A-Mrazek Moving Systems and the site contact for the property was identified as Mr. Mike Ploesser.

4.6 Reason For Performing Phase I

The User has instructed that this Phase I ESA be performed in order to qualify for Landowner Liability Protection to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability, and to satisfy due diligence environmental assessment requirements in connection with the planned purchase of the subject property.

4.7 Other User Provided Information

PE provided the User with the User Questionnaire, which was filled out by the User and returned to PE. The following documents (in the table below) were made available for this Phase I ESA. Copies of all documentation and user provided information is included in **Appendix D.**

Title/Description	Date	Source
User Questionnaire	February 16, 2023	Mr. William Bensing, Director of Public Services

5.0 RECORDS REVIEW

5.1 Environmental Records Sources

An environmental database report generated by EDR consisting of the search of standard, reasonably ascertainable regulatory record sources pertaining to the subject property and the surrounding area was reviewed. A copy of the EDR Summary Radius Map Report is included in **Appendix E**. The purpose of the regulatory review is to assist in identifying RECs on the subject property.

Listed below are the federal and state databases that were searched and the number of sites that were encountered within the search area for each. The search area encompassed distances up to one mile from the perimeter of the site. EDR uses the United States (U.S.) Census Bureau and U.S. Post Office address files to generate their reports. However, due to conversion of address data to location coordinates and the accuracy level of government records, the locations may not match actual physical locations.

Facilities located beyond the approximate minimum search distance (AMSD) required by the ASTM Standard may be listed in the EDR Report and not otherwise addressed in this Phase I ESA. The following table summarizes the number of sites identified within the AMSD for each respective regulatory listing. See the EDR Summary Radius Map Report for a complete list of acronyms and definitions of the databases listed below.

Environmental Records Source Summary

Database	Target Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted

5.1.1 Federal Database Records

The subject property was listed in the following standard federal agency databases researched:

Mrazek Van & Storage
545 Leffingwell Avenue
Databases: Resource Conservation Recovery Act (RCRA) - NonGen/No Longer Regulated (NLR), Facility Index System (FINDS), Enforcement and Compliance History Online (ECHO)
Discussion: According to EDR, the subject property was identified in the RCRA-NonGenerator, FINDS, and ECHO databases in connection with the local general freight and trucking operation at the subject property since it was initially registered in 1993. There are no reported violations in connection with the RCRA listing. The facility was listed in the FINDS and ECHO databases in connection with the RCRA listing and are considered administrative in nature.
Summary: Based on the absence of reported violations and nature of the listings, PE does not consider these listings to represent a REC in connection with the subject property.

The following listing(s) for the surrounding area with a known or potential for release to the subject property were identified in the following federal databases:

RCRA Generators: The EDR Database report resulted in eleven surrounding locations registered with the RCRA of 1976. There are six classifications for hazardous waste facilities under RCRA. These classifications consist of RCRA Non-Generators, RCRA Treatment, Storage and Disposal Facility (TSDF), RCRA Small Quantity Generators (SQG), RCRA Very Small Quantity Generators Database (VSQG), RCRA Conditionally Exempt Small Quantity Generators (CESQG) and RCRA Large Quantity Generators (LQG). All but one of the listings were identified in the NonGen / NLR database. The remaining listings was identified in the RCRA-SQG database. Following review of the listings, based on the nature of operations, proximity, assumed groundwater gradient, or lack of outstanding violations, none of the RCRA listings are considered to represent a REC in connection to the subject property.

Based on distance, assumed groundwater gradient, topography, current regulatory status, and/or the absence of reported releases, none of the other listings identified in the federal databases reported in the EDR database report are considered to represent a likely past, present or material threat of release to the subject property.

5.1.2 State and Tribal Database Records

The subject property was listed in the following state and tribal agency database researched:

Mrazek Moving Systems
545 Leffingwell Avenue
Databases: UST
Discussion: According to EDR, the subject property was identified in the UST database in connection with the presence of a 10,000-gallon diesel tank that was formerly present at the subject property. EDR indicated that the tank was installed in 1968 and last used in 1986. The subject property issued a closure notice to the MDNR in October of 1990 and issued an approval letter in November of 1990. PE reviewed the MDNR E-START database to review available records in connection with the subject property. According to the MDNR, a petroleum storage tank closure was addressed prior to the adoption of the 2004 Missouri RBCA guidance for petroleum storage tanks. The MDNR also provided

that an evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client. A copy of the request is included in **Appendix H**.
Summary: Based on the absence of testing documentation available following the closure of the UST and the RBCA guidance currently in use, PE considers the former UST to represent a REC in connection with the subject property.

Based on distance, assumed groundwater gradient, topography, current regulatory status, closed status of the site, and/or the absence of reported releases, none of the other listings identified in the state and tribal databases reported in the EDR database report are considered to represent a likely past, present or material threat to the subject property.

5.1.3 Local Environmental Records Sources

Health Department

PE contacted the St. Louis County Department of Public Health for information concerning the subject property. PE received a response from Katrina Utz on behalf of Ms. Celeste Vossmeyer, Custodian of Records for the department. According to Ms. Utz, the department contains no records responsive to the request. A copy of this request and response are included in **Appendix H**.

Fire Department

PE contacted the City of Kirkwood Fire Department for information concerning the subject property. PE received a response from Ms. Bonny Hoylman, with the City. According to Ms. Hoylman, there have been no fire code violations, USTs, hazardous materials stored, or reported environmental concerns regarding the subject property. A copy of the request and response are included in **Appendix H**.

5.2 Historical Use Sources

Reasonably ascertainable standard historical sources (aerial photographs, topographic maps, sanborn fire insurance maps and city directories) related to the subject property and immediate surrounding areas were reviewed. The objective of consulting historical sources is to develop a history of the previous uses of the subject property and surrounding areas in order to help identify the likelihood of past uses having led to RECs in connection with the subject property. This task attempts to identify all obvious uses of the subject property from the present back to its first developed use, or back to 1940, whichever is earlier. This section summarizes the historical records review that was performed. Details of the subject property use and surrounding property uses are characterized in the subsections below.

Period	Property Uses	Surrounding Area Uses	Source	Interval Comments
Prior to 1940	Residential, Commercial	Residential	City Directories, Aerial Photographs, Topographic Maps	Earliest available record were city directory listings from 1930. Data gap was identified from 1931 to 1936; however, not significant as the property use is assumed to be residential and commercial.

1941 to 1960	Residential, Commercial	Residential, Commercial	City Directories, Aerial Photographs, Topographic Maps	No data gaps.
1961 to 1980	Residential, Commercial	Residential, Commercial	City Directories, Aerial Photographs, Topographic Maps	No data gaps.
1981 to 2000	Residential, Commercial	Residential, Commercial	City Directories, Aerial Photographs, Topographic Maps	No data gaps.
2001 to Present	Residential, Commercial	Residential, Commercial	City Directories, Aerial Photographs, Topographic Maps, Local Records	No data gaps.

5.2.1 Aerial Photographs

Aerial photographs of the area of the subject property taken in 1937, 1941, 1953, 1958, 1965, 1968, 1971, 1974, 1980, 1985, 1990, 1996, 2006, 2009, 2012, and 2020 were reviewed. Copies of the historical aerial photographs are presented **in Appendix G**.

Date	Scale	Property Description	Surrounding Area Description
1937, 1941	1" = 500'	The subject property is shown as developed with a large square commercial structure on the southern portion of the subject property and four single-family residences on the west and northwest portions of the subject property along South Elliott Avenue. The northeastern portions of the subject property appear to be mostly vacant grassland.	The surrounding area is shown with multiple residential structures further to the west, the current cemetery across a set of railroad tracks further to the south, and vacant grass covered land to the northeast. The southeast adjoining property appears to be undergoing development.
1953	1" = 500'	The subject property remains unchanged from the previous photographs.	The surrounding area is mostly unchanged from the previous photographs; however, additional residences have been developed to the north and northeast. Two commercial properties are also shown to have been developed to the east and southeast on the north side of the adjoining railroad tracks
1958	1" = 500'	The subject property appears mostly unchanged; however, the southern commercial structure appears to have been removed from the property.	The surrounding area is mostly unchanged from the previous photograph.
1965, 1968, 1971	1" = 500'	The subject property appears with increased vegetation on the north and northeast portions of the property. Two of the residential properties on the west and northern portions of the property appear to have been removed.	The surrounding area is mostly unchanged from the previous photograph. Increased commercial development appears further to the east.

Date	Scale	Property Description	Surrounding Area Description
1974	1" = 500'	The subject property is shown to have been redeveloped on the southern portion of the property by the current garage building as well as the southern portion of the current warehouse building. One residence appears to remain on the northern portion of the property along Elliott Avenue.	The surrounding area remains unchanged.
1980, 1985, 1990, 1996	1" = 500'	The subject property remains unchanged from the previous photograph.	The surrounding area is mostly unchanged from the previous photographs; however, the eastern adjoining property appears to have been redeveloped by two of the current commercial buildings. Additionally, an industrial supply yard appears to have been expanded and is present to the southwest across the railroad tracks.
2006	1" = 500'	The subject property appears as it currently is developed. The northern portion of the warehouse building and the office area extension have been developed. The former residences on the northern portion of the property appear to have been removed.	The surrounding area is mostly unchanged from the previous photographs; however, the current northeast adjoining substation appears developed.
2009, 2012, 2020	1" = 500'	The subject property appears as it is currently developed and is unchanged from the previous photograph.	The surrounding area is mostly unchanged; however, the northeast adjoining residential properties are undergoing redevelopment and the current commercial structures are being developed. By 2020, the surrounding area is developed as it is currently.

Review of the aerial photographs revealed that the subject property was developed by the first available aerial photograph from 1937 by a large commercial building and single-family residential structures. The commercial structure was removed from the property by 1958, and the southern portion of the current warehouse along with the current garage building were shown to be developed on the property by 1974. From 1980 to 1996, two to three of the residential structures were removed from the property. By 2006, the subject property was shown to be fully developed by the current warehouse and office space, and garage building.

The surrounding area appeared to be primarily occupied by residential and commercial properties throughout the available photographs. A railroad and cemetery adjoin the subject property to the south.

Review of the aerial photographs did not reveal any RECs in connection with the subject property.

5.2.2 Topographic Maps

The historical USGS topographic maps provided by EDR were reviewed for the years 1940, 1954, 1968, 1974, 1982, 1993, 2015, and 2017. The historical topographic maps reviewed are included in **Appendix G**.

In 1940, the topographic map depicts the subject property surrounded by the current municipal roadways to the northeast and west. The current railroad line appears running from southwest to northeast along the southern boundary of property separating the subject property from Oak Hill Cemetery. No structures are depicted on this map, only schools, churches, municipal locations, parks, and cemeteries. The subject property is depicted within a yellow shaded area, indicating urban development, but with no developed structures indicated. A stream is depicted to be running along the northeast portion of the subject property to the southeast.

The 1954 map depicts the subject property with a commercial structure on the southern portion of the subject property and four smaller structures on the west and northern portions of the property. The southeast adjoining property contains a single commercial structure that is labeled as sewage disposal. The rest of the surrounding area is depicted with multiple small structures to the west and north of the subject property indicating single-family residential structures.

The 1968 map depicts the subject property as mostly vacant with two small remaining structures on the northern portion of the subject property. The structures to the north and west are now depicted within a pink shaded area, indicating residential development. The remaining areas of the subject property and surrounding area remain unchanged.

The 1974, 1982, and 1993 maps depict the subject property with the southern portion of the current warehouse the current garage buildings on the southern portion of the property, and the two smaller structures to the north. Additional commercial development appears further to the east.

The maps from 2015 and 2017 do not depict any structures. The features depicted include cemeteries, roadways, interstates, waterways, railroads, schools, municipalities, police stations, and fire stations.

Review of the topographic maps did not reveal any RECs in connection with the subject property or surrounding area.

5.2.3 Fire Insurance Maps

EDR's Sanborn Fire Insurance Map Report showed no coverage of the subject property or adjoining properties. A copy of the Fire Insurance Map report is included in **Appendix G**.

5.2.4 City Directories

Information from historical street directories that were published from 1930 to 2017 were available for review. A City Directory report from EDR is included in **Appendix G**.

Review of the City Directories indicated the following uses for the subject property and surrounding area:

Subject Property

545 Leffingwell Avenue
2017 - AMrazek Moving Systems, Mayflower Transit, The Alvarez Law Firm
2014 - AMrazek Moving Systems Inc., United Mayflower Storage & Moving Co.
2009 - AMrazek Moving Systems, Inc., Go Mini
2006, 2004 - AMrazek Moving Systems
2001, 1999 - United Van Lines
1994 - AMrazek Moving Systems
1986 - Du Bois Chemicals Division Of Chemed Corp, Mrazek Van & Storage

1979 - Downtown Express Co Equipment Movers, Du Bois Chemicals, Mrazek Van & Storage Co.

600 South Elliott Avenue
2001 - No Return
1949, 1953, 1958 - Ernest D Figgs, Ernest Bridges

612 South Elliott Avenue
1949, 1953, 1958 - Lester Roeder, Geo Peters, Marvin Peters

618 South Elliott Avenue
1949 - Engelhardt Bros (Greenhouse)

Surrounding Properties

572 Leffingwell Avenue (East Adjoining):
2017, 2014, 2009 - Gateway Representatives
2006, 2004 - Gateway Representatives, Crystal Company
2001, 1994 - Crystal Company
1986 - JE Redington

567/569 Leffingwell Avenue (Southeast Adjoining):
2017, 2014, 2009, 2006 - Des Peres Welding, Frisch Masonry
2004 - Frisch Masonry
1994, 1986 - JR Day
1979, 1973 - Republic Roofing Co Warehouse

566 Leffingwell Avenue (East Adjoining):
2014 - Edgebanding Services Inc.
2009 - Senoret Chemical Co
2006 - Marie Barker Inc.
2001, 1999, 1994, 1986 - Senoret Chemical, Marie Barker Inc.
1961 - Metropolitan St. Louis Sewer

556 Leffingwell Avenue (Northeast Adjoining):
2017, 2014 - Innovative Energy Kirkwood

The remaining surrounding properties consisted of residential occupants.

Review of the City Directories identified the subject property as AMrazek Moving Systems, Mayflower Transit, The Alvarez Law Firm, United Mayflower Storage & Moving Co., United Van Lines, Du Bois Chemicals Division Of Chemed Corp, Mrazek Van & Storage, Downtown Express Co Equipment Movers, and Mrazek Van & Storage Co. throughout the available city directory listings from 1979 to 2017.

From 1949 to 1958, the subject property contained residential property owners for former listings along South Elliott Avenue and a greenhouse listing for the commercial building on the southwest portion of the subject property that was identified in Sections 5.2.1 and 5.2.2 at 618 South Elliott Avenue in 1949.

The surrounding area was identified with multiple residential listings along Elliott Avenue as well as various commercial businesses along Leffingwell Avenue.

According to historical information discussed above in Sections 5.2.1 and 5.2.2, the greenhouse was identified to be present on the subject property from 1937 to 1949 and having been removed by 1958. See Section 5.2.10 for further discussion.

Review of the City Directories did not reveal any RECs in connection with the subject property or surrounding area.

5.2.5 Property Tax Files

A search for tax files for the property was conducted by PE. Review of the St. Louis County Assessor's website revealed that subject property is composed of two parcels that are currently owned by Sabada Properties LLC. County tax records are available on behalf of the parcels dating back to 2009.

5.2.6 Land Title Records

PE reviewed recorded land title records for the property from the environmental lien search where a copy of the deed was available for review. The current owner was listed as Sabada Properties LLC, with a deed recorded date of December 30, 2014. The ownership of the property was transferred five separate times dating back to 1989 which was from the oldest deed of record identified.

The review of recorded land title records did not identify past uses indicating RECs in connection with the property.

5.2.7 Building Department Records

PE contacted the City of Kirkwood Building and Planning Departments for information regarding the subject property. To date of writing this report, PE has not received a response from the departments. Should information be obtained that significant alters the conclusions of this assessment, PE will forward all pertinent information to the Client. A copy of this request is provided in **Appendix H**.

5.2.8 Zoning Records

PE reviewed the Kirkwood Zoning Code Map website to identify a zoning classification of subject property. Based on the zoning map, obtained from the Kirkwood Planning and Zoning Department, the property is designated as zone I1, which is classified as Light Industrial. A copy of the zoning map is provided in **Appendix J.**

5.2.9 Prior Reports

The User did not supply PE with any prior reports pertaining to the subject property.

5.2.10 Other Historical Use Sources

The subject property was identified to contain a greenhouse on the southwest portion of the subject property in records from 1937 until it was shown to be removed by 1958 based on available aerial photographs, topographic maps, and city directory listings. PE researched the name of the city directory listing provided in 1949, *Engelhardt Bros (Greenhouse)*. During the research, PE identified a file record of a law suit from 1953 identified as *Bergamo v. Engelhardt*. The suit involving Rudolph and Otto Engelhardt (defendants) and Emmy Rose Bergamo (plaintiff) claimed that husband of the plaintiff accidently ingested insecticide at the property, known as *Engelhardt Brothers Nursery*, in December of 1950 following cleanup efforts from a hailstorm that broke out the glass of the 16,000 SF greenhouse. The husband subsequently died following the incident and the plaintiff was awarded a judgement of $7,500 for primary negligence of the defendants following the husband's death. The greenhouse is considered to have closed following the judgement in 1953.

Although, insecticides and other poisonous substances were identified to be kept on the premises, historical records indicate that the greenhouse was present on the subject property for approximately 16 years, and had been shown to be removed by 1958. Additionally, the surface material was reworked and graded out in 1973 for the development of the current asphalt parking lot that is placed over the former greenhouse location. Based on the length of duration on the subject property and the reworked surface material near the greenhouse footprint for the asphalt installation, PE does not consider the former greenhouse or the likely presence of poisonous substances at the subject

property in 1950 to represent a REC in connection with the subject property at this time. A copy of the legal record is included in **Appendix G**.

6.0 SITE RECONNAISSANCE

Information regarding the site reconnaissance of the subject property is discussed below in further detail.

6.1 Methodology and Limiting Conditions

Mr. Garrett Westland of PE conducted the site reconnaissance of the subject property on February 20, 2023. During the site reconnaissance, Mr. Westland was escorted throughout the property by owner, Mr. David Sabada. The subject property was visually observed in order to obtain information indicating the likelihood of identifying RECs in connection with the subject property. Land use of adjacent properties were also observed to evaluate potential environmental impact. Photographs of the condition of the property taken during the site reconnaissance are located in **Appendix C**.

The site reconnaissance consisted of visual and physical observations as follows. The periphery and the acreage of the subject property were traversed by foot. Adjoining properties were viewed from the subject property and from the public thoroughfares. Surrounding areas were viewed from public thoroughfares.

The site reconnaissance is limited to those observations visible at the time of the site visit. Only exposed portions of the site were observed. Reasonable efforts were made to visually and physically inspect the entirety of the subject property.

The weather conditions at the time of the site reconnaissance visit were sunny and 50 degrees without any limiting conditions.

6.2 Hazardous Substances and Petroleum Products

PE observed the presence of hazardous substances and petroleum products located within the garage building of the subject property. Currently, the garage building is utilized for the storage of maintenance and other outdoor equipment. PE observed the garage to contain various amounts of plastic 5-gallon or less gasoline and kerosene containers, four 55-gallon drums of antifreeze and motor oils, 10 to 15 aerosol paint cans, and small retail sized containers of household herbicides.

There were no signs of spills or improper disposal of these materials observed within the garage building. According to the property owner, the building was once used to perform vehicle maintenance on fleet vehicles used in connection with historical moving and storage operations; however, it has since been used for storage over the past 20 to 30 years.

Based on the observed use and storage of the materials within the garage building, PE does not consider these substances and products to represent a REC in connection with the subject property.

6.3 USTs

PE did not observe the presence of USTs on the subject property; however, during the interview with the subject property owner, PE was provided with information that indicated a 10,000-gallon diesel UST was formerly located on the subject property on the northwest side of the garage building. Additionally, PE did observe the presence of a potential vent pipe remaining on the northwest corner of the building. Mr. Sabada provided PE with a copy of a UST closure notification sent to the MDNR on behalf of the subject property on November 2, 1990. According to the letter, completion of closure of the UST was approved for on or after November 22, 1990. A copy of the closure notification is provided in **Appendix J**. According to the property owner, the UST was subsequently removed following the notification due to it affecting the integrity of the adjacent weight scale located to the north of the UST pit.

PE reviewed the MDNR E-START database to review available records in connection with the subject property. According to MDNR, a petroleum storage tank closure was addressed prior to the adoption

of the 2004 Missouri RBCA guidance for petroleum storage tanks. An evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client. Based on the absence of testing documentation available following the closure of the UST and the RBCA guidance currently in use, PE considers the former UST to represent a REC in connection with the subject property.

6.4 ASTs

PE did not observe the presence of any aboveground storage tanks (ASTs) on the subject property during the site reconnaissance.

6.5 Drums and Unidentified Substance Containers

PE did observe the presence of drums on the subject property. As discussed in Section 6.2, four 55-gallon drums containing antifreeze and motor oil were identified within the garage building on the subject property. The drums were observed in good condition at the time of the site reconnaissance and there were no signs of leaks or spills in the vicinity of the garage.

Based on the observed condition, the drums are not considered to represent a REC in connection with the subject property.

6.6 Polychlorinated Biphenyls (PCBs)

PE observed the following suspect PCB-containing materials/structures during the site reconnaissance:

One pad-mounted and one-pole mounted electrical transformer was observed on the southeast portion of the subject property. Some transformers, depending on their age, may contain PCB-contaminated oil. PE did not observe staining on or around the pad- and pole-mounted transformers. The transformers are owned and maintained by the electrical utility company, Ameren Missouri. It is the utility providers responsibility to maintain these transformers. Based on the observed conditions and the utility-owned status of the transformers, the presence of the transformers do not represent a REC in connection with the subject property.

6.7 Drains and Sumps

PE did observe the presence of drains on the subject property. Drains were observed within the maintenance and mechanical rooms of the office and warehouse building as well as in the restroom and the garage bay of the garage building. During site reconnaissance, no signs of staining or spills were observed in the vicinity of the drains. All drains reportedly connect to the local sanitary sewer system of the subject property.

Based on the observed conditions, the floor drains are not considered to represent a REC in connection with the subject property at this time.

6.8 Wastewater Discharge

PE did not observe evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) on the subject property with the exception of the following:

Commercial sanitary sewage and stormwater is generated at the property and is disposed of by means of the sanitary sewer lines. The Metropolitan St. Louis Sewer District is responsible for maintaining these lines.

Based on the observed conditions, the generation and disposal of wastewater at the subject property is not considered to represent a REC in connection with the subject property at this time.

6.9 Nonhazardous Solid Waste

PE observed the presence of solid waste in connection with the subject property as summarized below.

PE observed the presence of one dumpster located on the southern side of the warehouse building. The dumpster was located on an asphalt and concrete surface. PE did not observe the presence of any staining in the vicinity of the dumpster.

The presence of the non-hazardous waste dumpster does not represent a REC to the property based on the observed conditions.

6.10 Pits, Ponds, and Lagoons

PE observed the presence of a stormwater detention pond located on the northern portion of the subject property. At the time of the site reconnaissance, the pond was observed to be dry. There were no signs of staining or stressed vegetation in the vicinity of the subject property.

Based on the observed conditions, PE does not consider the pond to represent a REC in connection with the subject property.

6.11 Stormwater Management System

The presence of stormwater runoff in connection with the subject property is discussed below:

During a rain event, rain flows over the subject property and drains to the east in relation to the topographic gradient of the site. PE observed the presence of a wetland drainage stream located on the northeast portion of the subject property running northwest to southeast along the northeastern boundary of the subject property. Runoff rain water will discharge to the east and follow the drainage flow to the southeast.

6.12 Wells

PE did not observe the presence of any dry wells, irrigation wells, injection wells, abandoned wells, or other wells on the subject property.

6.13 Interior/Exterior Observations

The subject property was observed to contain a 76,000 SF warehouse building containing a three-story office area, and a 3,500 SF commercial auto garage building both constructed of concrete block walls and concrete foundations. Both structures were developed in 1973 and the warehouse structure was expanded in 2005. The exterior of the subject property was observed to contain concrete and asphalt paved parking areas, a metal fence surrounding the property building, overhead electric lines and poles, overhead light poles, and a storm water detention pond located on the northern portion of the subject property. Originally, the 3,500 SF garage was developed to provide a location to perform maintenance on vehicles utilized in connection with the moving and storage business.

6.14 Odors

PE did not observe the presence of any strong, pungent, or noxious odors at the subject property or adjoining property.

6.15 Pools of Liquid

PE did not observe the presence of any pools of standing water or other liquids on the subject property.

6.16 Stains or Corrosion

PE did not observe any stained soil or corrosion on the subject property during the site reconnaissance.

6.17 Stressed Vegetation

No stressed vegetation was observed on the subject property during the site reconnaissance.

6.18 Septic Systems

PE did not observe evidence of an on-site septic systems or cesspools on the subject property.

6.19 Heating and Cooling

The building appears to have a forced air Heating, Ventilation, and Air Conditioning (HVAC) system (central air). Many HVAC systems utilize chlorofluorocarbons (CFCs) or hydrochlorofluorocarbons (HCFCs), which require special handling by an EPA-licensed refrigeration contractor for servicing or disposal. The presence of an HVAC system is not considered to be a REC in connection with the subject property.

6.20 Site Reconnaissance Summary

PE completed the site reconnaissance for the subject property on February 20, 2023. PE did not observe the presence of any ASTs, wells, odors, pools of liquid, stains or corrosion, stressed vegetation, pits, lagoons, or septic systems present on the subject property. PE did observe the presence of a pad- and pole-mounted transformer near the southeast portion of the subject property and a stormwater detention pond on the northern portion of the property. Floor drains, hazardous substances and petroleum related products, and drums were also identified at the subject property and discussed in the sections above.

During the site visit, PE was provided with information that indicated a 10,000-gallon diesel UST was formerly located on the subject property on the northwest side of the garage building. Mr. Sabada provided PE with a copy of a UST closure notification sent to the MDNR on behalf of the subject property on November 2, 1990. According to the letter, completion of closure of the UST was approved for on or after November 22, 1990. A copy of the closure notification is provided in **Appendix J**.

PE reviewed the MDNR E-START database to review available records in connection with the subject property. According to the MDNR, a petroleum storage tank closure was addressed prior to the adoption of the 2004 Missouri RBCA guidance for petroleum storage tanks. The MDNR also provided that an evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client. Based on the absence of testing documentation available following the closure of the UST and the current RBCA guidance in use, PE considers the former UST to represent a REC in connection with the subject property.

Adjacent to the former UST location, a 3,500 SF commercial auto garage building was developed on the subject property in 1973 and was originally utilized to facilitate vehicular maintenance activities on

the subject property. Within the garage building, PE observed one floor drain located in the large garage bay within the northern portion of the building. According to the property owner, since the property was acquired in 1986, the garage has not been used to perform maintenance; however, its use prior to the property acquisition could not be confirmed. Based on the historical intended use of the garage for maintenance purposes, the likely presence that motor oils and potentially hazardous substances were generated from the garage, and the connection to the former UST, PE considers the garage building and the likely potential of historical vehicle maintenance being performed on the subject property to represent a REC in connection with the subject property.

7.0 VAPOR ENCROACHMENT SCREENING

This VES was not conducted in full compliance with ASTM E2600-10; rather, the screen allows the EP to consider the likelihood that VECs exist at the subject property, though a full determination of VEC is beyond the scope of a Phase I ESA. Consideration of vapor encroachment consists of reviewing available information, including the EDR VES report and all tasks mentioned above (Sections 3-6) and use of professional judgment in determining if suspected contaminated sites exist on or near the subject property and whether soil and/or groundwater has been impacted within the critical distance of the subject property.

"Critical Distances" refer to the maximum distances at which vapor encroachment may occur; these distances vary depending on topographic and hydrologic gradient and type of contaminant known or suspected to exist. If a facility is beyond the critical distance, it is highly unlikely that a VEC exists. Based on the ASTM E2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions, the critical distances are as follows:

- 1,760 Feet (1/3 mile) for upgradient properties, except for dissolved petroleum hydrocarbons, which have a critical distance of 528 feet;
- 365 Feet for crossgradient properties;
- 100 Feet for downgradient properties, with the exception of dissolved petroleum hydrocarbons which have a critical distance of 30 feet. If non-aqueous phase petroleum hydrocarbons are present, the 100 feet distance is utilized.

Based on a review of topographic information and observations made during the site reconnaissance, it appears that the subject property is generally flat with a gradual slope to the east. Upgradient topographic elevations exist to the west.

A VES report generated by EDR comparing known regulatory record sources pertaining to the subject property and the surrounding area against soil, topographic and groundwater data was reviewed.

According to EDR, the subject property was identified in the UST database in connection with the presence of a 10,000-gallon diesel tank that was formerly present at the subject property. EDR indicated that the tank was installed in 1968 and last used in 1986. The subject property issued a closure notice to the MDNR in October of 1990 and issued an approval letter in November of 1990. PE reviewed the MDNR E-START database to review available records in connection with the subject property. According to the MDNR, a petroleum storage tank closure was addressed prior to the adoption of the 2004 Missouri RBCA guidance for petroleum storage tanks. The MDNR also provided that an evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client. Based on the absence of testing documentation available following the closure of the UST and the RBCA guidance currently in use, PE considers the former UST to represent a REC and a VEC in connection with the subject property.

Based on the review of these records and the EP's opinion, none of the other sites identified in the EDR Radius Map Report are likely to represent a VEC in connection with the subject property. A copy of the EDR VES Report is included in **Appendix J**.

8.0 INTERVIEWS

The section summarizes the interviews conducted by Mr. Garett Westland with PE, regarding use and characteristics of the subject property and adjoining properties.

Information pertaining to these interviews are discussed in applicable sections of this report. The details of these interviews are included on Record of Communication Forms and are included in **Appendix H**.

9.0 ADDITIONAL SERVICES

No non-scope items were requested by the User in the scope of work for this Phase I ESA.

10.0 FINDINGS AND CONCLUSIONS

Based upon information obtained during this Phase I ESA, this section summarizes our findings and opinions.

10.1 Findings and Opinion

Finding: Standard historical sources have revealed that the subject property was shown to have been developed by 1937 by a large commercial building and four single-family residential structures. City directory listings identify the commercial structure as Engelhardt Brothers Nursery in a listing from 1949. The greenhouse structure was viewed to have been removed from the subject property by 1958. From 1968 to 2005, the residential structures were removed in segments from the subject property. In 2005, the subject property building was expanded with the northern extension of the warehouse and eastern office space. The subject property is currently currently utilized as a commercial warehouse and office used by a moving and storage operation that has operated on the subject property since 1973.

As discussed above, the subject property was identified to contain a greenhouse on the southwest portion of the subject property in records from 1937 until it was shown to be removed by 1958 based on available aerial photographs, topographic maps, and city directory listings. PE researched the name of the city directory listing provided in 1949, *Engelhardt Bros (Greenhouse)*. During the research, PE identified a file record of a law suit from 1953 identified as *Bergamo v. Engelhardt*. The suit involving Rudolph and Otto Engelhardt (defendants) and Emmy Rose Bergamo (plaintiff) claimed that husband of the plaintiff accidently ingested insecticide at the property, known as *Engelhardt Brothers Nursery*, in December of 1950 following cleanup efforts from a hailstorm that broke out the glass of the 16,000 SF greenhouse. The husband subsequently died following the incident and the plaintiff was awarded a judgement of $7,500 for primary negligence of the defendants following the husband's death. The greenhouse is considered to have closed following the judgement in 1953. Although, insecticides and other poisonous substances were identified to be kept on the premises, historical records indicate that the greenhouse was present on the subject property for approximately 16 years, and had been shown to be removed by 1958. Additionally, the surface material was reworked and graded out in 1973 for the development of the current asphalt parking lot that is placed over the former greenhouse location.

- **Opinion:** Based on the length of duration on the subject property and the reworked surface material near the greenhouse footprint for the asphalt installation, PE does not consider the former greenhouse or the likely presence of poisonous substances at the subject property in 1950 to represent a REC in connection with the subject property at this time.

Finding: According to EDR and following review of the Radius Map Report, the subject property was identified in the UST database in connection with the presence of a 10,000-gallon diesel UST that was formerly located at the subject property. EDR indicated that the tank was installed in 1968 and last used in 1986. The subject property issued a closure notice to the MDNR in October of 1990 and issued an approval letter in November of 1990. PE reviewed the MDNR E-START database to review available records in connection with the subject property. According to MDNR, a petroleum storage tank closure was addressed prior to the adoption of the 2004 Missouri RBCA guidance for petroleum storage tanks. The MDNR also provided that an evaluation found that no further action was warranted based on the tank closure or corrective action process in use at that time. Details on the UST removal or reported testing documentation was not provided. PE submitted a records request to the MDNR in order to obtain the provided closure documentation regarding the UST; however, a response from the department has not yet been received. Should information be obtained that significantly alters the conclusions of this assessment, PE will forward all pertinent information to the Client.

- **Opinion:** Based on the absence of testing documentation available following the closure of the UST and the current RBCA guidance in use, PE considers the former UST to represent a REC and a VEC in connection with the subject property.

Finding: During the performance of the site reconnaissance, PE observed a 3,500-square foot commercial auto garage building, located adjacent to the former UST that was originally utilized to

facilitate vehicular maintenance activities on the subject property. Within the garage building, PE observed one floor drain located in the large garage bay within the northern portion of the building. According to the property owner, since the property was acquired in 1986, the garage has not been used to perform maintenance, however its use prior to the property acquisition could not be confirmed.

- **Opinion:** Based on the historical intended use of the garage for maintenance purposes, the likely presence that motor oils and potentially hazardous substances generated from the garage, and the connection to the former UST, PE considers the garage building and the likely potential of historical vehicle maintenance being performed on the subject property to represent a REC in connection with the subject property.

10.2 Conclusions

PE has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E 1527-21 of the property located at 545 Leffingwell Avenue in the City of Kirkwood, MO. Any exceptions to, or deletions from, this practice are described in *Section 2* of this report.

This assessment has revealed the following RECs, CRECs, and/or significant data gaps in connection with the subject property:

- Based on the absence of testing documentation available following the closure of the UST and the current RBCA guidance in use, PE considers the former UST to represent a REC and a VEC in connection with the subject property.

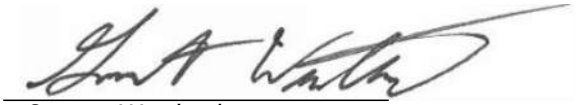
- Based on the historical intended use of the garage for maintenance purposes, the likely presence that motor oils and potentially hazardous substances generated from the garage, and the connection to the former UST, PE considers the garage building and the likely potential of historical vehicle maintenance being performed on the subject property to represent a REC in connection with the subject property.

See Section 1.3 for recommendations associated with these findings.

11.0 QUALIFICATION(S) AND SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

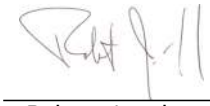
This Phase I ESA was conducted by Mr. Garrett Westland, the Environmental Professional for PE and Mr. Robert Louden, Sr. Technical Reviewer. Qualifications of Mr. Westland, and Mr. Louden are included in **Appendix I**.

Site Assessor:



Garrett Westland — March 7, 2023
Project Manager — Date

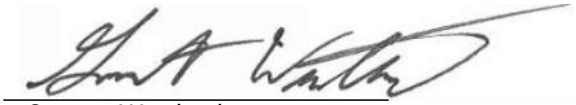
Senior Reviewer:



Robert Louden — March 7, 2023
Sr. Technical Reviewer — Date

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312, and that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional:



Garrett Westland — March 7, 2023
Project Manager — Date

13.0 DEFINITIONS

The term "recognized environmental condition," as defined by the ASTM Standard, means *"the presence of hazardous substances or petroleum products in, on, or at a property: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The terms "environment" and "release" are both defined as per the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) 42 United States Code (USC). Under CERCLA, a "release" is defined as "*any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous pollutant or contaminant," and "environment" is defined as "the navigable waters, the waters of the contiguous zone, and the ocean waters, and any other surface water, groundwater, drinking water supply, land surface or subsurface strata.*"

The term "*de minimis* condition," as referred to in the ASTM Standard, means *"condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions."*

The term "historical recognized environmental condition," as defined by the ASTM Standard, means *"a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted residential use criteria established by a regulatory authority or authorities, without subjecting the property to any required controls (e.g. property use restrictions or AULs)".* A past release that qualified as an HREC may no longer qualify as an HREC if new conditions or information have been identified such as, among other things, a change in regulatory criteria or a subsequently identified migration pathway that was not previously known or evaluated. As per the ASTM Standard, the report's Findings and Opinions section shall include the EP's rationale for concluding that a condition at the subject property is or is not currently a REC or an HREC.

The term "controlled recognized environmental condition," as defined by the ASTM Standard, means *"REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities (e.g. as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (e.g. property use restrictions or AULs)".* As per the ASTM standard, CRECs shall be listed in the Findings and Opinions Section, but shall be listed as RECs in the Conclusions Section.

The term "business environmental risk," as defined by the ASTM Standard, means *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, and is not necessarily an issue required to be investigated under this practice".*

USER QUESTIONNAIRE

For Phase I Environmental Site Assessment

This questionnaire form has been prepared for use in a Phase I Environmental Site Assessment (ESA) where the Owner of the subject property and the User* of the Phase I ESA are different entities. The completed form will be included in the final Phase I ESA Report.

The answers in this questionnaire have been prepared by the User and provided to the environmental professional pursuant to 40 CFR 312.25, 312.28, 312.29, 312.30, 312.31, and ASTM E 1527-13, required to potentially qualify for one of the *Landowner Liability Protections* (LLPs) under the Brownfields Revitalization Act of 2001 and the Comprehensive Environmental Response Compensation and Liability Act of 1980 (CERCLA), as amended. The information provided herein is intended solely to (i) assist the environmental professional in gathering relevant and material information for the Phase I ESA, and (ii) to document the User's compliance with the additional inquiries required under 40 CFR 312, and shall be used for no other purpose. The information is accurate to User's knowledge as of the date prepared.

SUBJECT PROPERTY (name/location): 545 Leffingwell Ave. Kirkwood MO 63122

USER(S): City of Kirkwood

PREPARED BY (Print Name and Relationship to User): William E. Bensing Jr. Director of Public Services

SIGNATURE:

DATE PREPARED: February 16, 2023

*Pursuant to ASTM E 1527-13, the "User" is the party seeking to complete the environmental site assessment of the property. It is also the person seeking to establish one or more of the LLPs under CERCLA. A user may include, without limitation, a potential purchaser or potential tenant of the property, an owner of the property, a lender or a property manager.

Responses to Questions 1-6 are required in order to qualify for one of the Landowner Liability Protections. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Please attach pertinent documents or additional sheets if extra space is needed for answers.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

In compliance with ASTM E 1527-13, it is the User's responsibility to engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records to search for environmental liens or activity and use limitations currently recorded against or relating to the property. Please provide documentation of this search, if possible, or note if the environmental professional performing the Phase I ESA has been tasked with obtaining these records.

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Answer: NO

(2) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Answer: NO

(3) Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (LLPs) (40 CFR 312.28).

Do you have any specialized knowledge or experience in connection with the property or nearby properties relevant to environmental matters? (For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?)

Answer: NO

(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Answer: N/A

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a) Do you have information about the past uses of the property?

Answer: Yes, UST clousure report dated November 22, 1990

(b) Do you have information about specific chemicals that are present or once were present at the property?

Answer: NO

(c) Do you know of spills, other chemical releases or cleanups that have taken place at the property?

Answer: No

(d) Do you know of any environmental cleanups that have taken place at the property?

Answer: No, only UST closure report dated Novemeber 22, 1990

(6) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Answer: Adjacent to a creek and railroad

USER INTERVIEW SECTION

The following information is not required; however, this section is intended to further assist the environmental professional with investigation of the subject property. If this section is not addressed, we will attempt to conduct an interview by telephone or in person. Please provide the following, if available and if not already provided:

1) The reason why the Phase I ESA is required (if not specified, PE will assume the purpose is to qualify for a landowner liability protection to CERCLA liability):
   Answer: potential property purchase

2) The type of property (for example: industrial, commercial, residential) and type of property transaction, if any (for example: sale, purchase, exchange, financing, etc.):
   Answer: Light Industrial, Purchase

3) The complete and correct address(es) or parcel numbers for the property if not already identified in this document, including county name (site maps or other documentation showing property location and boundaries is helpful):
   Answer:

4) The scope of services required for the Phase I ESA (including whether any parties to the property transaction may have a required standard scope of services or whether any considerations beyond the requirements of ASTM Practice E 1527 are to be considered):
   Answer: N/A

5) Identification of all parties who will rely on the Phase I ESA report:
   Answer: City of Kirkwood

6) Identification of the site contact and how the contact can be reached (e.g., name, address, email, phone number of key site manager):
   Answer: Mike Ploesser - Phone: 314-265-8968 - email: m_ploesser@a-mrazek.com

7) Any special terms and conditions which must be agreed upon by the environmental professional:

Answer: N/A

8) Any other knowledge, experience, information, or documentation regarding the property that may be pertinent to the environmental professional, for example:

- legal description of property, acreage, number of parcels, and special identifiers (e.g., parcel number, loan number): 24M240161/24M240172, +/- 9 acres

- descriptions of site, including: buildings on property (number, age, square footage, current use), structures, roads, and other improvements on the site, physical characteristics:
  2- buildings, 76,000 sq.ft., warehouse/office

- information on current and past zoning of subject property and adjoining properties:
  Light Industrial south and east/ residential north and west

- any other information, documents, correspondence, etc., concerning the property and its environmental condition: N/A

In addition, please provide the following information to the best of your knowledge, if not previously provided:

1) The current official owner of record:

2) When and from whom the property was purchased or acquired:

3) Contact information for previous owners:

4) Any other known historical occupants or owners:

5) Current and historical uses of the property: Light Industrial

6) Current and historical uses of adjoining properties: Light Industrial south and east/ residential north and v

7) Any suspected or known environmental problems on site or adjoining properties: No

8) Suppliers of potable water, electricity, natural gas, sewer services:
Kirkwood Water, Ameren,Spire, MSD, Kirkwood Electric

9) Has the property or adjoining properties ever been used as:

gas station	❑ Yes	☑ No
motor repair facility	❑ Yes	☑ No
commercial printing facility	❑ Yes	☑ No
dry cleaners	❑ Yes	☑ No
photo developing laboratory	❑ Yes	☑ No
junkyard, landfill, disposal, dump or burn pit	❑ Yes	☑ No
waste treatment storage, disposal, processing or recycling facility	❑ Yes	☑ No

Explain:

10) Are there currently or were there previously any of the following on the site or adjoining properties:

drums	❑ Yes	☑ No
chemicals in individual containers of >5 gal (19 L)	❑ Yes	☑ No
petroleum products or hazardous substances	☑ Yes	❑ No
vent pipes, fill pipes, or access ways to a fill pipe in the ground	❑ Yes	☑ No
fuel storage tanks (aboveground or underground)	☑ Yes	❑ No
transformers, capacitors, hydraulic equipment	❑ Yes	☑ No
septic systems, pits, ponds, or lagoons for waste treatment or disposal	❑ Yes	☑ No
cisterns, private well, or non-public water system	❑ Yes	☑ No
gas/oil wells	❑ Yes	☑ No
buried pipelines (such as petroleum)	❑ Yes	☑ No
stained soil, ground surface, drains, flooring, walls	❑ Yes	☑ No
discharge of waste liquids other than storm water	❑ Yes	☑ No
effluence/air emissions	❑ Yes	☑ No
sinkholes	❑ Yes	☑ No
imported fill materials (soil, rock, rubble)	❑ Yes	☑ No
oil or other substances applied to the ground surface	❑ Yes	☑ No
demolished buildings	❑ Yes	☑ No
debris	❑ Yes	☑ No
pesticide usage	❑ Yes	☑ No

Explain:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are

3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Environmental Interest/Information System:
The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.

MRAZEK VAN & STORAGE (Continued) **1007137346**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Affectd By Funding Level From PSTIF:	No
General Comments:	A leak was found in the UL discharge line and occurred only when the dispenser was running. The tanks were for company use only. The leak was found 4' from the UL dispenser. Soil was excavated from the product line trench and where the lines connected to the USTs. New piping was installed and the excavated soil was returned to the trench. A composit sample was taken from 3 places along the line. No GW was encountered.

General Comments: 5/24/2017 RMB. Outstanding issues 1] pictures of capped lines at both ends and pic of tank after filled with gravel, 2] SOC, 3] soil & GW samples > DTLs, submit WP for SC. 7/21/2017 RMB. Outstanding closure items addressed. Still need WP. 9/14/17 TB Status letter issued. 30-day response. 10/24/17 TB Reviewed SC WP. Proposed 6 sb/mw. BTEXN, Oxy, GRO, EDB, EDC, lead. 2 geotech samples. GWM event. Approved as written. Req methanol/ethanol for gw sampling. 90-day response. 11/14/17 TB Reviewed PSTIF cost approval for 6 sb/mw, one gwm event, SC/RA reporting. 3/14/18 TB Issued status letter. 30-day response. 6/27/18 JK--rev WP and SCR; The work plan also included results from site characterization activities that took place at the site during January and February 2018. The report stated that groundwater was delineated and soil needed additional delineation to the east and south of MW4. Additional delineation appears necessary in groundwater east and south of MW4 and may be necessary north and west of MW5 and MW6, depending on the established and approved delineation criteria. It is unclear what delineation criteria were used previously for this site. The delineation should be to the default target levels in soil and groundwater unless otherwise approved. The work plan proposes installing two additional soil borings for delineation. The scope of work is approved. Req report in 90 days. 9/25/18 JK--sent email to Jeff Neal at Landmark asking for an update and when report will be submitted. 10/18/18 JK--rev SCR and RA; The site characterization report summarized activities that took place at the site during January 2018 through July 2018. Free product was not detected during site characterization and sampling events. Groundwater sampling was performed in February 2018. The risk assessment provided an examination of the risk to current and future receptors from contamination at the site. The risk assessment concluded that there was no current or future risk to and relevant receptors. Following the review of the reports, the Department offers the following comments and recommendations: 1. It appears that soil and groundwater are not delineated to residential criteria in the direction east of MW-4 and B-11. Since there are residences located to the east of the site, we suggest an additional soil boring and monitoring well east of MW-4 and B-11. 2. The risk assessment concluded that the off-site property to the east was to be used for non-residential purposes for the future. Please provide additional information and include contact information for the off-site property owner so that we may verify the properties reasonably anticipated future use. 3. The report recommended three additional groundwater monitoring events in order to demonstrate plume stability. Additional monitoring may be necessary to accomplish this objective. Req report in 90 days. 1/22/19 JK--drafted status letter 5/21/19 JK--drafted status 2 letter with LOW and NOV language. 11/13/19 RK -- LOW sent with mention of previous

ROCK HILL MECHANICAL CORP (Continued) **1000868708**

status letters 1-7-20 vg ap wp for add gwm. Also approved RAFU for off-site properties. Report on next groundwater monitoring event due in 90 days. 5/13/20 TM -- rev GWMR. Next GWMR due in 90 days. 7/29/20 TM -- rev GWMR. Benzene delineated to the residential indoor inhalation RBTL in all directions on-site. TPH-GRO delineated to the residential indoor inhalation RBTL in all directions on-site. One more groundwater monitoring event is planned. Next report due in 90 days 11/9/20 TM -- rev GWMR/PSA and work plan. Gwm report documents fourth event. PSA does not provide sufficient data to demonstrate a stable/decreasing plume. WP proposes 2 additional gwm events. GWMR due in 90 days. 1/19/21 TM -- rev GWMR. One more event planned, due in 90 days. 4/26/21 PH- Issued SL 5/5/21 - PH - Received GWM and PSA which only included benzene. Requested updated PS with other drivers and lower boundaries. 6-23-2021 PH -- Issued SL 7/15/2021 PH -- Received response letter and called Chris Macdonald. Discussed Plume stability and decided that the plume is stable. Will issue nfa. 7-26-2021 7/30/21 Issued NFA

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D028
Waste Description: 1,2-DICHLOROETHANE

Waste Code: D029
Waste Description: 1,1-DICHLOROETHYLENE

Waste Code: D030
Waste Description: 2,4-DINITROTOLUENE

Waste Code: D031
Waste Description: HEPTACHLOR (AND ITS EPOXIDE)

Waste Code: D032
Waste Description: HEXACHLOROBENZENE

Waste Code: D033
Waste Description: HEXACHLOROBUTADIENE

Waste Code: D034
Waste Description: HEXACHLOROETHANE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D036
Waste Description: NITROBENZENE

Waste Code: D037
Waste Description: PENTACHLOROPHENOL

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: D041
Waste Description: 2,4,5-TRICHLOROPHENOL

Waste Code: D042
Waste Description: 2,4,6-TRICHLOROPHENOL

Waste Code: D043
Waste Description: VINYL CHLORIDE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

WEXFORD LABS INC (Continued) **1007109482**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P120
Waste Description: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U159
Waste Description: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Description:	CORROSIVE WASTE
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D016
Waste Description:	2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)
Waste Code:	D019
Waste Description:	CARBON TETRACHLORIDE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE,

KIRKWOOD SCHOOL DISTRICT DEPARTMENT OF BUILDINGS AND GROUND (Continued) 1007107132

1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Application Received:	10/18/1999
State Funded:	Not reported
Federal Funded:	Not reported
Acreage:	5.6
Operable Unit:	Greif Brothers Corporation-Kirkwood
Site Description:	This site has been operated as a fiber drum manufacturing facility by Greif Brothers since their purchase of it in 1957. Prior to 1957, little is known about the site history. As part of a property transfer, environmental investigations identified petroleum contamination in soil near a former underground storage tank (UST) basin.
Contaminant:	Diesel

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The MO-DNR (Missouri Department of Natural Resources) program involves a Resource Assessment and Monitoring Program, biological criteria development, monitoring of targeted sites to determine compliance with the designated use of aquatic life protection in the standards, monitoring for 303(3) purposes, and the development of a stream classification framework.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LockOut Flag:	No	
Comments:	I agree with your plan to close under non-residential soil type two risk based target levels, and understand that due to site specific circumstances, the closure report will not be submitted to the department within the 60-day period. RMB to consultant 9/17/2008 The Missouri Department of Natural Resources Hazardous Waste Program, Tanks Section, has reviewed the Missouri Risk-Based Corrective Action (MRBCA) closure report dated November20, 2008, submitted by Landmark (Landmark) Environmental Associates for the above referenced facility. The closure report evaluated risks to human health and the environment resulting from a possible petroleum release from the tank system during its operation and summarized corrective actions taken to address those risks. The closure report indicates Landmark adequately evaluated these risks and the closure requirements for the tank listed above, using the Missouri Risk-Based Corrective Action target levels for Tier 1, Soil Type 1, non-residential land use. 1/29/09 BB

ART MINT LIMITED (FORMER) (Continued) **S110605895**

Operable Unit: Art Mint Limited (former)
Site Description: This site is located in the northeast corner of a property that is used by the Kirkwood Public Works facilities. Gateway Hose and Coupling Company, an asbestos fire hose manufacturer, once occupied the property. In 2002, Kirkwood purchased the property. Subsurface investigations revealed the presence of asbestos in the soil. The city intended to convert the site into a paved parking area for Publics Works equipment and vehicles.
Contaminant: Asbestos,Metals,Lead,PCE,VOCs

CRESTWOOD CORPORATION (Continued) **S108741210**

Site Description: This site is located on the south side of Big Bend Boulevard, 800 feet east of the eastbound Big Bend exit from Interstate 44. A gasoline filling station was located on the property from the 1930s to 1950s. The applicant owns the property and has used it for a parking lot. The property was to be sold for development of an office building. Somewhat elevated concentrations of petroleum chemicals of concern were detected in soil and groundwater samples collected on the site during preparation of Phase II Environmental Site Assessments (ESAs) conducted in 2000 and 2006.
Contaminant: Petroleum - misc

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Registry of Confirmed Abandoned or Uncontrolled Hazardous Waste Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Site List

Brownfields are sites where redevelopment and reuse is hampered by known or suspected contamination with hazardous substances. While many brownfield sites are minimally contaminated, potential environmental liability can be a problem for owners, operators, prospective buyers and financial institutions. Because of the large number of these sites, their economic impact especially in heavily industrial areas is substantial.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022
Date Data Arrived at EDR: 11/16/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

545 LEFFINGWELL
545 LEFFINGWELL AVENUE
SAINT LOUIS, MO 63122

TARGET PROPERTY COORDINATES

Latitude (North):	38.5723 - 38ˆ 34’ 20.28’’
Longitude (West):	90.39867 - 90ˆ 23’ 55.21’’
Universal Tranverse Mercator:	Zone 15
UTM X (Meters):	726626.8
UTM Y (Meters):	4272318.0
Elevation:	603 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	10295933 KIRKWOOD, MO
Version Date:	2017

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

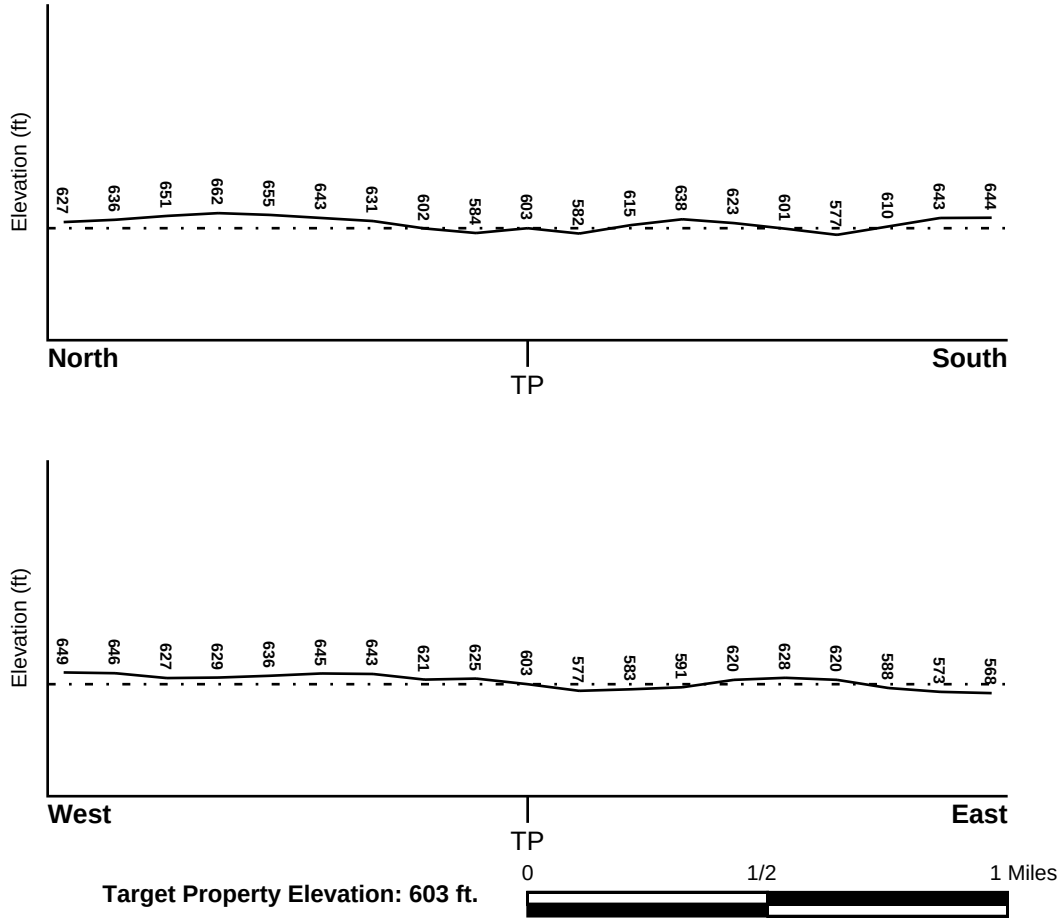
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
29099C0050E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
KIRKWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Winfield

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 99 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.1
2	9 inches	59 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.1
3	59 inches	72 inches	silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 7.3 Min: 5.1

Soil Map ID: 4

Soil Component Name: Fishpot

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: National Wetland Inventory of Missouri
Source: Department of Natural Resources
Telephone: 573-751-5110

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Contact: Garrett Westland

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Professional Env. Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 6090-401D-A7C2

PO # NA

Project 362.01.003

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 6090-401D-A7C2

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Jones, Hocker, Gladney & Grand, Lon Hocker, St. Louis, for respondent.

HOUSER, Commissioner.

This is an action for damages brought by Emmy Rose Bergamo against her brothers, Rudolph and Otto Engelhardt, arising out of the death of plaintiff's husband, John Bergamo, caused by the drinking of poison on the premises operated by defendants in the City of Kirkwood and known as Engelhardt Brothers Nursery. From a judgment for plaintiff for $7,500 defendants have appealed to this court.

The petition alleged that John Bergamo, an invitee on the premises of defendants, was invited to partake of wine and died from the effects of drinking from a bottle containing poison which was located at a place where refreshments were kept. Various assignments of negligence were made, including that of permitting the poison to remain in a place where it was likely that persons invited to partake of food would mistake the poison for wine, and failing to warn plaintiff's husband of the danger therefrom. The answer was a general denial coupled with a plea that deceased's negligence caused or contributed to cause his death.

On December 2, 1950 a hailstorm broke the glass out of some 16,000 square feet of defendants' green houses, thus exposing the plants growing therein to the danger of immediate freezing. In response to a call for help issued by telephone and radio at the behest of defendants a large number of relatives, neighbors and friends, including 30 Boy Scouts, appeared within a short time to assist defendants in salvaging the plants, moving them to other greenhouses and cleaning up the damaged property. They were all unpaid volunteers, none of whom was employed by defendants to render this service. During the evening coffee and sandwiches were provided for the refreshment of the volunteer workers. A cafe sent over a coffee urn. Defendants bought 150 to 200 sandwiches at a time. This was served to the people in a workroom, adjacent to the greenhouses. The coffee and sandwiches were put on a bench in the shed. Defendants customarily kept bottles of poisonous insecticide in that same workroom. The insecticide was used by them for pest control in the operation of the nursery business. These bottles remained in their permanent place and were not moved from the time the hailstorm struck until the tragedy occurred. Late in the evening of December 2 a neighbor brought a gallon of wine, which was set on a desk next to the telephone, 10 or 15 feet from the table where the poisons were kept. The wine remained there all night and was at no time opened or

touched. On the morning of December 3 there were used paper cups and whatever food was left over from the night before on the two benches in the workroom. John Bergamo, brother-in-law of defendants, was invited to come and help. Unable to respond on December 2 because of the conditions of his employment, he arrived on the premises on December 3 and assisted in the work until the time he drank the poison. When Bergamo arrived there were about 200 people on the premises. After John Bergamo arrived on the premises on December 3 a friend brought a quart of wine to Rudolph Engelhardt. It was cold, wet and muddy where the people were working. With the quart of wine in his hand Rudolph Engelhardt walked out into the greenhouse and called to them to have a drink of wine. According to Engelhardt he said "Let's go in the kitchen and have this drink of wine." He particularly called Bergamo and "several other fellows" that were close to him. Bergamo was 50 or 60 feet from Engelhardt at the time. In this connection plaintiff's witness Esther M. Schmidt testified "I don't remember him telling any

particular individual that there was wine to drink, but Mr. Engelhardt said when anyone got cold there was *wine in the workroom on the stand."* (Emphasis ours.) At the time the invitation was extended John Bergamo was in one of the greenhouses which opens into the workroom and Engelhardt was 50 or 60 feet from the bench in the work shed. Engelhardt turned around and started to walk to the kitchen. Four or five people started to follow him. Apparently in the short interval which elapsed from the time the invitation was extended to the time Engelhardt arrived at the door of the workroom on his way to the kitchen John Bergamo took a drink from the bottle of insecticide in the workroom, for he was heard to say: "Oh, Rudy, what kind of wine have you got? I drank out of the gallon jug, took the wrong stuff, I am dying, I am dying." (Composite statement of various witnesses.) Bergamo was in the workroom at the time he made these statements. He tried to get some water at the nearby sink, but collapsed almost immediately, within one or two minutes. Immediate efforts were made to wash out his mouth and administer an emetic, but his jaws became rigid and could not be opened, and within a very short time he died. The cause of death was the swallowing of a lethal dose of tetraethyl-pyrophosphate, an extremely poisonous insecticide.

The poisonous liquid was kept in a glass jug. The insecticide was brown, the color of nicotine. It had a label on it, a 3-inch band which extended halfway around the bottle, and which bore the words "Poison Danger! Hazardous liquid. Can be absorbed through the skin," together with two skulls and crossbones. In order to use the concentrate the directions required that it be diluted with water at the rate of 1 pound (1 pint) to 100 gallons of water, or 1 teaspoonful to 1 gallon of water. It was a one gallon glass jug, of the same kind as the gallon wine jug, and except for the label the two bottles looked alike. They were "similar, almost identical." The color of the wine was about the same color as the insecticide. For years the insecticide had been kept on the bench in the work shed. Three bottles of insecticide customarily stood on the corner of the workbench. They were covered with "paper and stuff" at the time John Bergamo arrived on the premises. It was not known whether they were covered up at the time Bergamo entered the workroom, although defendant Rudolph Engelhardt admitted that "Maybe the cover got removed off of it * * * there was so much confusion there." It was not known whether the label was facing the wall or facing Bergamo at the time Bergamo took the drink of poison. It was a dark day and there was no testimony as to whether the electric lights were on in the workroom. Bergamo had previously worked for defendants for a space of about two years. During that time the

poisons were kept in the same place on the premises, although Bergamo did not handle the poisons and insecticides around the greenhouses. The poison, according to Rudolph Engelhardt, has a "pretty powerful" odor. Bergamo and plaintiff came to this country in 1938. There was no evidence that Bergamo could or that he could not read the English language, although it was in evidence that he was store manager for a liquor company, and that in 1944 he became a naturalized citizen of the United States. No statement or warning was given by defendants to any one about poison.

Appellants raise three points: Error in refusing to direct a verdict for appellants (1) for failure to make a submissible case, (2) because deceased was guilty of negligence as a matter of law, and (3) error in the giving of Instruction No. 1.

An invitor owes an invitee a common-law duty to warn of the presence and danger of a poisonous substance customarily kept and exposed on his premises, which is known to the invitor but unknown to the invitee, where such poisonous substance is permitted to remain in a place or exposed under such circumstances that it would in any way be probable that the invitee might mistake it for a wholesome substance

[262 S.W.2d 310]

and, partaking thereof, be injured. Keiley v. Bristol, 30 Ga.App. 725, 119 S.E. 334; 72 C.J.S., Poisons, § 5, p. 168. On the other hand, even though the invitor might have failed to perform his duty to warn, there is no liability if the invitee failed to exercise that ordinary care for his own security and safety which reasonably may be expected of any person of common sense and prudence in his situation.

Plaintiff made a submissible case of primary negligence by showing knowledge on the part of defendants of the fact that the poisons were kept in the workroom on the work bench, invitation to the deceased to come on to the premises and partake of wine "in the workroom on the stand," use of foods and beverages in the workroom during the emergency giving the workroom the general appearance of a place set aside temporarily for the purpose of eating and drinking, the presence in the room of two identical glass jugs, placed within 10 to 15 feet of each other, containing liquids of the same color and appearance, both of which were on tables or benches, one of which was wholesome and the other poison, and failure to warn the deceased of the presence and danger of the poison. The first point, therefore, must be ruled adversely to appellants' contentions.

Nor do we find this to be a case of contributory negligence as a matter of law, as appellants claim. This is not the case of an intermeddler or trespasser who without occasion or excuse goes out of his way to explore the contents of containers in an out-of-the-way portion of the premises, under circumstances where it is extremely improbable that any person not acquainted with the use of the containers would find them, as in Callahan v. Warne, 40 Mo. 131, cited by appellants. The case at bar is that of a general invitee on the premises who is specifically invited to go to the particular room and indeed to the very stand where the poison is located and there to have wine, under circumstances where, considering the great similarity between the two bottles in size and appearance, the bottle of virulent poison reasonably might be mistaken for the bottle of wholesome wine. Appellants stress various factors which, in retrospection, might have been regarded as sufficient notification to Bergamo of the danger, such as the odor of the liquid, the warning of danger printed on the label, and the fact that Bergamo had worked at the greenhouse for nearly two years. There were, however, other considerations which entitled the jury to find as it did. The deceased received the assurance from defendant Rudolph Engelhardt that there was "wine in the workroom on the stand." When he arrived at the place where he was invited to go he found used cups setting about on the benches and other evidence indicating that people had been eating and drinking there, which constituted an assurance of safety to Bergamo. The size and shape of the container and the color of the liquid conveyed the image of a jug of wine. The jug was placed on the work stand where, according to witness Schmidt, Engelhardt had announced that the wine was located. Furthermore, the evidence relating to the ability of Bergamo to see the warning on the label was extremely uncertain. It was a dark day. There was no evidence that the lights in the workroom were burning. There was nothing to show that the label on the bottle of poison faced Bergamo at the time he poured from the bottle. It may very well have been facing toward the wall. Although he had worked at the greenhouse for an extended period, the evidence explicity showed that during that employment he did not handle the poisons, and there was no positive proof that Bergamo knew that the bottles kept on the workbench contained poisons. It was therefore a case for the jury, and not for the court, and we cannot convict the trial court of error in refusing to direct a verdict for appellants on the ground that Bergamo was guilty of contributory negligence as a matter of law.

Appellants claim that Instruction No. 1 erroneously failed to negative the defense of contributory negligence. Plaintiff's theory of the case, however, was correctly submitted by Instruction No. 1,

[262 S.W.2d 311]

and Instruction No. 2 was a proper instruction on the question of contributory negligence. Instructions must be read and construed together, and where taken together they contain a complete exposition of the law and cover every phase of the case, a verdict obtained thereon will be sustained even though the instructions, taken separately, may be incomplete and open to objection and criticism. Rhinelander v. St. Louis-San Francisco Ry. Co., Mo.Sup., 257 S.W.2d 655, loc.cit. 659. If the instructions, taken as a whole, properly submit the question of contributory negligence, the failure of the plaintiff in his verdict-directing instruction to negative contributory negligence is not reversible error. Heigold v. United Rys. Co. of St. Louis, 308 Mo. 142, 271 S.W. 773; Williams v. Springfield Gas & Electric Co., 274 Mo. 1, 202 S.W. 1; Wallnitz v. Werner, Mo.App., 241 S.W. 668; Straub v. Laclede Gaslight Co., Mo.App., 287 S.W. 1061; Wheeler v. Breeding, Mo.App., 109 S.W.2d 1237; Finley v. Austin, Mo.App., 132 S.W.2d 1109.

Appellants further contend that Instruction No. 1 when read with other instructions was confusing and misleading to the jury. The jury returned to the courtroom after deliberating for a time and the foreman asked for an interpretation of the instructions, saying that the jury was at a loss to know just how to proceed. He stated that

> Instruction No. 1 gives certain circumstances under which we find for plaintiff and Instruction No. 2 gives certain circumstances under which we find for the defendant and Instruction No. 3 defines what `ordinary care' is, and Instruction No. 4 says that we must first find the defendant negligent, but says nothing about contributory negligence on the part of the plaintiff, whether they must find that separately or not.

Instruction No. 4 prohibited the jury from considering the amount of damages to be awarded plaintiff until after the jury had determined the preliminary question of the negligence of defendants as submitted and defined by the other instructions. It is obvious that Instruction No. 1, offered by respondent, did not inject any confusion, but that any difficulty experienced by the jury arose out of Instruction No. 4, which was offered by appellants. Apparently the jury understood that it must first resolve the question of whether defendants were negligent, but questioned whether, before considering the amount of damages, they were required to make a separate finding on the question of contributory negligence. Although that question remained unanswered at the end of the conference with the court, the jury again retired and later rendered a verdict for plaintiff. From the fact of the rendition of that verdict in the regular form we must assume that the jury finally understood that no separate finding on the question of contributory negligence was necessary, resolved the question of contributory negligence adversely to appellants, and understood that in a general verdict for plaintiff there inheres a finding adverse to defendants on the issue of contributory negligence. The point is without merit.

there inheres a finding adverse to defendants on the issue of contributory negligence. The point is without merit.

No error appearing, the Commissioner recommends that the judgment of the circuit court be affirmed.

PER CURIAM.

The foregoing opinion of HOUSER, C., is adopted as the opinion of the court.

The judgment of the circuit court is, accordingly, affirmed.

BENNICK, P. J., and ANDERSON and RUDDY, JJ., concur.

RE: Building Department - Freedom of Information Act Request

Dear Freedom of Information Act Officer,

PE has been contracted to perform a Phase I Environmental Site Assessment for the property listed below.

- 545 Leffingwell Avenue, Kirkwood, MO; Parcel locator number: 24M240172

A Freedom of Information Act (FOIA) is necessary in order to complete this request. We request access to copies of records pertaining to the following:

1) Any environmental, hazardous waste or petroleum records for the site?
2) Any Information regarding date of construction for the facilities?
3) A copy of the most recent inspection report (if applicable) and information regarding outstanding building code violations.
4) What is the current zoning classification of the property?

If there are any applicable fees for these records or research of these records, **payment of fees must be approved prior to conducting**. Please contact me at gwestland@pe-engrs.com.

Please send a copy of your response by mail or email. If you have any questions, please do not hesitate to email. Thank you for your prompt attention to this request.

Sincerely,

Professional Environmental Engineers, Inc.

RE: Building Department - Freedom of Information Act Request

Dear Freedom of Information Act Officer,

PE has been contracted to perform a Phase I Environmental Site Assessment for the property listed below.

- 545 Leffingwell Avenue, Kirkwood, MO; Parcel locator number: 24M240172

A Freedom of Information Act (FOIA) is necessary in order to complete this request. We request access to copies of records pertaining to the following:

1) What is the current Fire Code enforced at the Property?
2) What is the date of the last Fire Department Inspection (if applicable)?
3) Are there any current or outstanding Fire Code Violations existing against the property? If yes, please attach a copy of each violation.
4) Are there currently or have there ever been any hazardous material spills, complaints, above ground storage tanks (ASTs) or Underground Storage Tanks (USTs) on the property or in the vicinity of the property?
5) Have there ever been any other potential environmental concerns on or in the vicinity of the property?

If there are any applicable fees for these records or research of these records, **payment of fees must be approved prior to conducting**. Please contact me at gwestland@pe-engrs.com.

Please send a copy of your response by mail or email. If you have any questions, please do not hesitate to email. Thank you for your prompt attention to this request.

Sincerely,

> You don't often get email from hoylmanb@kirkwoodmo.org. Learn why this is important

Mr. Westland,

We have found nothing in our files (paper/electronic) regarding any incidents related to Fire Code Violations, Underground Tanks or the storage of Hazardous Materials at 545 Leffingwell Avenue, Kirkwood, Missouri. There was also nothing noted regarding any environmental concerns.

Please do not hesitate to contact me if you have any questions, or need additional information.

Thank you.

Subject: Sunshine Request :: Q018917-030323
Date: Friday, March 3, 2023 10:54:07 AM

Dear Garrett Westland:

I am in receipt of your request for records on 3/3/2023, under the Sunshine Law, Chapter 610, RSMo. Under the Missouri Sunshine Law, all open and responsive records maintained by the Missouri Department of Natural Resources will be made available to you. Your request was given the reference number Q018917-030323 for tracking purposes.

Records Requested: I am requesting to review any an all available documentation regarding Facility #ST0004027. Specifically if there was any provided testing documentation provided following removal of the former underground storage tank. Attached is the Missouri E-START Site Summary.

Your request will be forwarded to relevant Department programs and regional offices to locate responsive documents and to determine the volume and cost associated with filling your request. The Department receives approximately 3,000 records requests per year, and currently has an average of 275 open requests, therefore we are unable to fulfill your request within three days. We estimate your records will be available on 4/3/2023. Within that time, you will receive a follow-up from the Department regarding the status of your request and whether additional time is needed to process it. We will contact you should your request prove more complicated than originally estimated and will advise you of our new estimated date your requested records will be available. Feel free to contact me regarding any questions concerning your request.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Thank you for your interest in keeping Missouri open and transparent.

EP Qualifications

KEY PERSONNEL

Professional Environmental Engineers, Inc.

Garrett T. Westland, R.G.
Geologist II

CAREER SUMMARY

Mr. Westland has over 6 years of experience working in the environmental field as a Geologist. He has experience in completing Phase I and II Environmental Site Assessments and Site Investigations as well as UST removal oversight and site closures in Kansas and Missouri. Mr. Westland has completed over 100 Phase I ESAs during his professional career. Mr. Westland has comprehensive experience performing asbestos inspections, abatement project oversight, air sampling, and sample analysis at numerous projects for public school systems, local governments, commercial, and retail clients. Mr. Westland, is also experienced in conducting lead-based paint inspections/risk assessments, industrial hygiene and indoor air quality studies, and microbial evaluations.

EDUCATION

B.S., Geology, Iowa State University, Ames, IA, August 2014

WORK HISTORY

- Professional Environmental Engineers, Inc. — February 2019 – Present
  Geologist II
- ATC Group Services LLC — August 2015 – February 2019
  Geologist
- Pinson Well Logging — July 2014 – August 2015
  Well-site Geologist

REGISTRATIONS/CERTIFICATIONS

Missouri Registered Geologist #2021003773
Illinois Licensed Asbestos Inspector
Illinois Licensed Lead Risk Assessor
Missouri Well Drillers Permit (Restricted)
Missouri Licensed Asbestos Inspector
Missouri Licensed Asbestos Supervisor
Missouri Licensed Lead Risk Assessor
Tennessee Licensed Asbestos Inspector
Arkansas Licensed Asbestos Inspector, Supervisor and Air Monitor

TRAINING

- 8- and 40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER)
- 10-Hour OSHA Construction Safety and Health
- Basic First Aid and CPR
- NIOSH 582 Asbestos Fiber Counting Course

PROJECT EXPERIENCE

- **Phase I Environmental Site Assessments**

  Project Role: Mr. Westland has completed numerous Environmental Due Diligence investigations in several states across the US including New York, West Virginia, Missouri, Illinois, Wisconsin and Kansas. Mr. Westland's duties included site reconnaissance, historical environmental records reviews (including aerial photographs, topographic maps, Sanborn fire insurance maps, city street directories, local building permits and related records), interviews, public records, data evaluation, and report preparation with determination of recognized environmental conditions.

- **Phase II Environmental Site Assessments and Subsurface Investigations**

  Project Role: Conduct monitoring activities on several retail petroleum facilities throughout Illinois and Missouri. Mr. Westland's specific activities included proposal preparation, bid requests, cost estimation and completion of field activities. Field activities included screening of soil, and soil collection during boring investigations. During sampling events, Mr. Westland completed gauging, purging, sampling, and removal of free product when necessary. Mr. Westland was involved in the installation of direct-push borings, temporary/permanent monitoring wells, geotechnical boring, and has direct experience interpreting soil in the field. Mr. Westland also helped prepare the associated reports which included interpretation of the analytical results and recommendations based on the findings.

- **National Park Service – CERCLA Preliminary Assessments/Sampling and Analysis Plans/Site Inspections/Engineering Evaluation and Cost Analysis Investigations**

  Project Role: Mr. Westland acted as the lead site manager, field geologist, and preparer of various CERCLA studies associated with multiple sites owned/operated by the National Park Service. The studies were required for the sites to gather data to support a site decision regarding the need for Superfund action. The sites were located in the following areas: Kings Canyon-Sequoia NP, Lake Mead National Recreation Area, Death Valley NP, Mojave National Preserve, Tule Springs Fossil Beds National Monument, Honouliuli National Historic Site, Yosemite National Park, Golden Gate National Recreation Area, Whiskeytown National Recreation Area, and Muir Woods National Monument.

- **Asbestos**

  Project Role: Mr. Westland has completed various asbestos inspections of commercial and residential properties in various states such as Illinois, Missouri, Arkansas and Tennessee. Mr. Westland's activities consisted of initial bulk sampling, quantifying all suspect materials, mapping all suspect materials, submission of samples to accredited laboratories, review of analysis, and preparation of final reports. Mr. Westland also provided third-party air monitoring and oversight services for a variety of abatement projects associated with these initial building inspections.

- **Lead-Based Paint**

  Project Role: Mr. Westland is a licensed risk assessor and lead inspector in the State of Missouri and Illinois. Mr. Westland has performed lead-based paint risk assessments and

lead inspections on various residential and commercial buildings throughout Missouri and Illinois. Specifically, two of these inspections have included a multi-building lower income housing complex in Cairo Illinois, and a multi-building lower income housing complex in Rock Island Illinois. Mr. Westland is proficient in completing HUD regulated lead-based paint risk assessments and has completed numerous inspections associated with the St. Louis County's Lead Inspection Program.

- **Mold/Indoor Air Quality**
  Project Role: Mr. Westland has performed numerous mold and indoor air quality investigations of commercial and residential properties throughout Missouri, Arkansas and Illinois. Mr. Westland's tasks on these mold assessments included bulk sampling and air monitoring, submission to accredited laboratories, review of analysis, and preparation of reports. Indoor Air Quality investigations involved the collection of air data in commercial properties experiencing air quality concerns from nearby landfill locations.

- **Moisture Intrusion**
  Project Role: Mr. Westland has performed moisture investigations including moisture mapping of commercial properties affected by Hurricane weather damage, specifically in the State of Florida. Mr. Westland's duties for these projects required contractor oversight, clearance testing, and microbial testing for damaged areas.

- **Noise**
  Project Role: Mr. Westland has conducted annual noise investigations in high active industrial warehouse facilities to determine risk towards employees using noise decibel meters. Mr. Westland's duties for these noise investigations required the compiling of noise data from data logging and data collection activities, as well as report preparation.

SPECIALTIES

- **Remediation Services**: Mr. Westland has conducted groundwater monitoring, well development/installation, soil and groundwater sampling, well abandonment, geotechnical borings, in-situ chemical injections using chemical oxidation and biodegradation, and bio-slurp studies involving separate phase hydrocarbon recovery on various projects throughout the State of Missouri and Illinois.
- **Underground Storage Tank Removal Services**: Mr. Westland has overseen the operations of two underground storage tank removal projects in the last 3 years.
  - The first involved the removal of three steel 10,000-gallon gasoline USTs, associated products lines, vent lines, and product dispensers at a former Phillips 66 site Wichita, Kansas. Tanks were set in insitu fine sand, strapped to a subsurface concrete slab. Was responsible for collecting soil samples from the sidewalls of the UST excavation, from the end of each tanks, underneath product piping, and product dispensers. Work was overseen by a KDHE representative. Site achieved clean closure following testing analysis and closure report preparation for the KDHE.
  - The second, involved the removal of six 10,000-gallon and one 8,000-gallon fiberglass gasoline and diesel USTs, associated product lines, vent lines, and product

dispensers at a former BP site in St. Louis, Missouri. The tanks were set in a pea gravel UST excavation in clay insitu soil. Was responsible for collecting samples from the sidewalls of the UST excavation near the capillary fringe zone, from underneath each end of the tanks, underneath product piping, product dispensers, and stock pile samples. Project required ongoing groundwater recharge removal in order to view the extent of the excavation to observe any visible hydrocarbon contamination. Wastewater was required to be discharged under a discharge permit from the local sewer department into the local sanitary sewer system near the site. Work was overseen by a PSTIF representative. Site achieved clean closure following testing analysis and closure report preparation for the MDNR.

- **AutoCAD Map Illustration**: Mr. Westland has created Iso-concentration, groundwater flow, cross-section, and facility drawing maps for the interpretation of groundwater and contaminant plume interpretation on active LUST sites seeking closure through the MDNR and KDHE Correction Action process. Mr. Westland is very proficient in using AutoCAD Map Illustration on a wide variety of projects including the construction of site diagrams for the Phase I Environmental Site Assessments, Phase II Environmental Site Assessments, Asbestos Surveys and Lead-Based Paint Surveys.

Career Summary

Mr. Louden is the Director of Assessment services for Professional Environmental Engineers, Inc. He has over 18 years of experience managing and conducting environmental operations throughout the United States for both commercial and government clientele. His background includes **Real Estate Transaction Services** (Phase I and II ESAs, property condition assessments, facility compliance audits, and inspections/surveys for hazardous materials, asbestos, lead, and radon), **UST Services** (tank removals/closures and installations, soil and groundwater assessments/remediation, RBCA risk assessments, and groundwater monitoring), **Asbestos and Lead Services** (surveys/inspections, third-party air monitoring, abatement design specifications, and O & M/management plan preparation), and **Miscellaneous Environmental Services** (health and safety management, geophysical surveying, project management, air sampling, waste management, emergency response, and small-scale construction projects).

Education/Training

1979-1983	Illinois State University	Normal, IL
	B.S., Geology	
1984-1987	Fort Hays State University	Hays, KS
	M.S., Earth Sciences	

- Site Remediation Training Course, IT Corporation
- Migration, Recovery, and Treatment of Hydrocarbon-Contaminated Groundwater Training Seminar, IT Corporation
- Project Manager Professional Development Course, IT Corporation
- Hazards and Protection, IT Corporation
- EPA Asbestos Inspector Certification, Professional Service Industries, Inc. (with Missouri State License)
- Phase I ESA Training Course, Professional Service Industries, Inc.
- EPA Asbestos Management Planner Certification, Environmental Training Center
- Asbestos/Lead Air Sampling Technician Training (unfinished), Professional Service Industries, Inc.
- Certificate Program in Hazardous Materials Management, University of California-Irvine; unfinished
- Certificate Program in Management Practice for Engineering and Technical Professionals, University of California-Irvine; unfinished
- OSHA 40-hour Hazwopper Training, 8-hour refresher, and Site Supervisor Training Courses per 29 CFR 1910.120
- Managing Safety: Techniques that work for Operations Managers, DuPont

Related Experience (Assessment Services)

Mr. Louden has provided Real Estate Transaction and other Assessment Services to a variety of clientele, including developers, architects, lending institutions, municipalities, utility companies, oil companies, government agencies, and other miscellaneous buyers/sellers. He has conducted investigations at hundreds of different site locations, including gas stations, dry cleaners, chemical plants, auto repair shops, tanneries, tar manufacturers, schools, restaurants, hotels/motels, car washes, printers, warehouses, farm land, machine shops, foundries, undeveloped property, vacant lots, plating facilities, shopping malls, laundry mats, and other

Related Experience (cont.)

miscellaneous manufacturing facilities. The following are descriptions of representative real estate transaction projects that Mr. Louden has worked on.

Vashon/JVL Initiative Study – Managed and conducted the Phase I Environmental Site Assessment (ESA) of a 90-block redevelopment area in the City of St. Louis. The investigation consisted of an extensive historical records search (over 190 Sanborn Maps, 20 aerial photographs, 550 pages of street directories, and 4 different dates of USGS topographic maps), an environmental government database records search, and site reconnaissance. Recognized environmental conditions were documented along with facilities containing lower risk environmental concerns. The information was presented in a final report designed to assist with the site selection process for future development projects.

Missouri USDA Grain Bin Sites – Conducted preliminary work (site reconnaissance, mapping, aerial photograph review, water well records searches, and phone interviews) for EPA Pre-CERCLIS Screening Assessment at 7 former USDA grain bin sites in Eastern Missouri. The facilities were typically contaminated with carbon tetrachloride, pesticide/insecticide derivatives, and nitrates/nitrites. Participated in the Pre-CERCLIS Screening Assessment field work, evaluated data, and prepared final reports with recommendations for all facilities in accordance with EPA specifications.

10th & Broadway – Managed Phase I and Phase II activities at a 20-acre brownfield site in East St. Louis, Illinois, for $57 million school district development project. Activities included soil and groundwater sampling, UST removals, geophysical surveys to locate subsurface materials, and a wetland delineation. Remedial activities are currently in progress to meet rigid development schedule and to insure reimbursement of UST cleanup costs through the Illinois Environmental Protection Agency.

Kansas City Jazz District – Coordinated and managed Phase I/Phase II soil and groundwater sampling activities at $80 million revitalization/redevelopment project in western Missouri. Activities were conducted over a seven-block area with environmental concerns resulting from former automotive repair facilities, auto salvage yards, gas stations, printers, dry cleaners, and a chemical company. Conducted cleanup of lead-impacted soils and asbestos containing building materials on schedule and under budget in conjunction with redevelopment activities.

Meuhlfarth Auto Salvage – Conducted and managed Phase II soil and groundwater sampling activities at 5-acre brownfield site in south St. Louis County. Identified extensive TCE plume on and off site and provided recommendations for proposed cleanup activities in conjunction with the MDNR Voluntary Cleanup Program. Worked closely with the County Economic Council, the current property owners, the MDNR, and the public to communicate assessment results and develop a cleanup strategy equitable to all parties.

UST Management – Designed an environmental management plan and conducted site assessments for multiple underground storage tanks (USTs) at 15 school district facilities in the metro-east area. Activities included removal of 20 tanks at 5 high-priority sites, liaison with the Illinois Environmental Protection Agency and Illinois Office of the State Fire Marshal, leak detection investigations, free-product recovery, and soil and groundwater remediation. Recently developed work plan and prepared specifications for removal of remaining USTs.

Century 105 Freeway Project – Coordinated and performed Phase II activities on property to be purchased by Caltrans for the Century 105 Freeway project in southern California (Lynwood,

Related Experience (cont.)

Compton, Southgate areas). Investigations included the drilling/sampling of approximately 150 borings in a highly-contaminated, 5-block, commercial/industrial area; groundwater monitoring wells were installed, developed, and sampled as well. Identified contaminants included metals, VOCs, PNAs, chlorinated solvents, PCBs, and miscellaneous hydrocarbon compounds. Provided recommendations for cleanup in accordance with state regulations.

National Client Group Services – Performed real estate transaction services for numerous nationwide commercial clients, including Dollar General, Applebee's, Best Buy, Taco Bell, and Office Depot. Services included standard Phase I and II ESAs, limited asbestos/lead surveys, radon sampling, soil and groundwater sampling, hazardous material surveys, and other miscellaneous tasks as requested. Facilities were located throughout southern Illinois and the state of Missouri.

Bank of America ERS Program – Managed/performed environmental risk screenings (ERSs), similar to ASTM Standard E 1528-96 for the Transaction Screen Process, on a number of sites throughout the Midwest area. Property values for these primarily commercial facilities were typically in the $100 to $500 K range. Investigations were limited to the subject property and adjacent/abutting facilities. Final reports documented the presence of recognized environmental conditions, as well as non-ASTM concerns such as lead-based paint, asbestos-containing materials, and the presence of hazardous materials. Recommendations for Phase II investigations including a scope of work and approximate budget were included where applicable.

Park Elementary – Managed Phase II activities at former elementary school in East St. Louis designated for $29 million redevelopment. Upon identifying the extent of asbestos and PNA contamination on site, a rapid $250,000 plus cleanup was initiated without delaying the proposed development. The cleanup was conducted in accordance with applicable state regulations and guidelines.

Burbank Airport Expansion – Performed site reconnaissance, interviews, soil sampling, and geophysical testing (magnetometer and ground penetrating radar surveys) on a number of commercial facilities to be purchased by the Burbank, California Airport during early stages of an expansion program (1987-1988). The investigations focused on environmental concerns associated with underground storage tanks and previous site operations.

City of St. Louis – Provided environmental oversight and conducted numerous Phase II investigations associated with renovation/development activities in the City of St. Louis (under city-wide environmental contract). Projects included asbestos monitoring and sampling activities, hazardous waste characterization and disposal activities, and soil and groundwater sampling activities at numerous different sites. Typically estimated associated environmental risks and potential downstream liabilities/costs at each site.

Mission Viejo National Bank – Managed and conducted real estate transaction investigations on numerous small commercial properties in southern California. Investigations included site reconnaissance, environmental government records database searches, asbestos/lead sampling, Phase II soil and groundwater sampling, and compliance audits.

Major Oil Company Sites – Conducted site assessment and remediation activities at hundreds of UST sites throughout the Midwest and west coast. Clients included Amoco, Mobil, Exxon, Chevron, Unocal, Shell/Texaco (Equillon), Southland, Circle K, and numerous small

independent oil companies. Specialized in determining risk-based cleanup objectives using Missouri CALM document, Illinois TACO document, and California LUFT Manual.

Chase Manhattan – Conducted several Phase I ESAs at facilities in southern California for Chase Manhattan Bank (CMB). Projects required work to be completed in accordance with specifications developed by CMB prior to ASTM Standard E 1527-97.

Brown School Demolition – Conducted asbestos and hazardous waste surveys in abandoned school and prepared specifications for removal of materials along with demolition of the existing structure.

Miscellaneous Projects

- Conducted groundwater investigations for chlorinated solvent plumes at Nemo and Yermo military bases near Barstow, California. Work consisted of drilling, installing, developing, and sampling deep groundwater wells and evaluation of data.
- Performed groundwater, soil, and surface water sampling activities at Times Beach Superfund site.
- Conducted UST compliance and assessment work at El Toro MCAS in Tustin, California and Camp Pendleton in Southern California.
- Performed groundwater sampling and reporting for Weldon Spring DOD Superfund site related to remediation of TNT-impacted soils.
- Performed UST removals, compliance, and assessment work at Scott Air Force Base in Southern Illinois.

Order Number:
79-290955-47

Our Environmental Lien and AUL report to 1980 provides a summary of recorded information on a specific property from January 1st, 1980 to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership, links the recorded transactions which pass title from one person (and/or entity) to another, and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from January 1st, 1980 forward. The scope of this search is compliant with ASTM 1527-21 standards.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include City, County, State, Federal and Tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Historical property transfer information from 1980 forward (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX Research, LLC specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

SPECIAL WARRANTY DEED

This Special Warranty Deed ("Deed"), made and entered into on December 23, 2014 by and between **Grantor: 545 Leffingwell, LLC,** , a Missouri limited liability company, organized and existing under the laws of Missouri, with its principal office in the County of St. Louis, State of Missouri whose address is c/o Brian Humes, 600 Washington, Suite 1800, St. Louis, MO 63101, and **Grantee: Sabada Properties, LLC**, a Missouri limited liability company, of the County of St. Louis, State of Missouri.
Mailing Address of the Grantee(s): 545 Leffingwell Avenue, St. Louis, MO 63122.

Witnesseth, that the Grantor, for and in consideration of the sum of One Dollar ($1.00) and other valuable consideration paid by the Grantee, the receipt of which is hereby acknowledged, does by these presents ***Bargain and Sell, Convey and Confirm*** unto the Grantee, the following described "Property"), situated in the County of St. Louis and State of Missouri, to-wit:

Lot A of the Consolidation Plat of part of Lots 66 and 67 of East Kirkwood, according to the plat thereof recorded in Plat Book 348 page 616 of St. Louis County Records.

Address:	545 Leffingwell Avenue 516 S Elliott Avenue
Locator Number:	24M 240 172 24M 240 161

Subject to building lines, easements, covenants, restrictions and conditions of record and to all zoning laws or ordinances affecting the Property, and possession and rights of tenants under recorded or unrecorded leases at the Property (collectively, the "Permitted Exceptions").

To Have and to Hold the same, together with all rights and appurtenances to the same belonging, unto the Grantee, and to the successors and assigns of such Grantee forever.

Grantor hereby covenanting that Grantor and the successors and assigns of such Grantor, shall and will ***Warrant and Defend*** the title to the Property unto the Grantee, and to the successors and assigns of Grantee forever, against the lawful claims of all persons claiming by, through or under Grantor but none other excepting, however, the general taxes for the calendar year 2014 and thereafter, and special taxes becoming a lien after the date of this Deed and the Permitted Exceptions. 14616371-00115

MISSOURI DEPARTMENT OF NATURAL RESOURCES

Missouri E-START Site/Facility Summary

This is an advisory about environmental conditions that could affect use of the property identified on the map below. Any property use limitations are intended to ensure safe use of the property after the cleanup of contamination in the soil and/or groundwater. This advisory identifies the governmental agencies that oversaw the sites cleanup, and provides contacts for further information.

Although this map and its underlying data sets have been compiled by the Missouri Department of Natural Resources (Department), no warranty, expressed or implied, is made by the Department as to the accuracy of the data and related materials. The act of distribution shall not constitute any such warranty, and no responsibility is assumed by the Department in the use of these data or related materials.

SITE MAP

Facility Closed Prior to Implementation of 2004 Tanks RBCA

Facility Identification Number ST0004027

Site/Facility Name MRAZEK MOVING SYSTEMS

Address 545 LEFFINGWELL

City KIRKWOOD

Zip 63122

County ST LOUIS COUNTY

Facility Type Former Underground Storage Tank Facilities

Status Facility Closed Prior to Implementation of 2004 Tanks RBCA

Summary A petroleum or hazardous substance storage tank closure or regulated release was addressed prior to the adoption of the 2004 Missouri Risk-Based Corrective Action Guidance for Petroleum Storage Tanks. An evaluation found that no further action was warranted based on the tank closure or corrective action process in use at the time. Please review the Department of Natural Resources site file for more information.
